

May 20, 2019

As part of the City's ongoing Street Maintenance Program, a Street Seal Coat and Crack repair project will be completed in a portion of the City this summer.

The area to be included in the project is bounded by Monroe street on the west, 81st Avenue on the south, Able Street on the east, and Sanburnol Drive on the north. Construction will occur sometime between June 1st and August 31st.

The contractor will place signs on the streets prior to construction to provide residents with advance notice. Access to homes will be maintained at all times.

Questions regarding the project should be directed to the Public Works Director at 763-784-6491.
