 \* Rating represents an assessment of stand establishment, chlorosis severity and yield performance  
 \*\* Indicates whether hybrid contains multiple agronomic phenotypic traits deemed important for continuous corn systems

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
