

# 2015 MTM-CNM Family Conference

## (Myotubular & Centronuclear Myopathy)

### Friday July 24<sup>th</sup> to Sunday July 26<sup>th</sup>, 2015

### Chicago, Illinois

Please join the Myotubular and Centronuclear Myopathy community for our fourth bi-annual conference. The Family Conference creates an opportunity for families and medical professionals to come together and share a unique opportunity to collaborate and move our community closer to clinical trial readiness.

The mission of our conference is two-fold:

- 1) With a deep awareness of the unique challenges in having or caring for someone with MTM-CNM, we seek to provide an enjoyable and enriching family-oriented conference experience that educates and unites the individuals and families affected by Myotubular (Centronuclear) Myopathy in supportive friendships and life-enhancing networking opportunities.
- 2) With hearts full of hope for the future, we seek to connect families in person to the top researchers in potential MTM-CNM treatments in order to get them acquainted with the latest advances in medicine and assistive technology and to get families signed up and registered in the various studies that will push research forward.

Please join us!

For more information about the conference please visit the  
MTM-CNM Family Connection, Inc website: [www.mtm-cnm.org](http://www.mtm-cnm.org)
