

*Affordable Clean Coal Energy - Made in USA
Reliability in a Proven Design - Over 80 Years in the making
Flexible - Hydronic Applications for the Home, Spa, Pool
Extensive Expertise on Van Wert Boiler System Technology*

Save Money!

How it Works:

- Built In Tank-Less Coil Heater Technology Supplies Hot Water Year Round On Demand!
- Turbo Vector Boiler Design Optimizes All Useful Energy into Heat!
- Fly-Ash Automatically removed!
- Simple Ash pan exchange: No messy excavating!

Got Coal?

How it Saves you Money:

- **On Average Anthracite Coal = \$140 a ton**

In this example, to heat cheaper than coal you NEED to:

- Buy wood pellets cheaper than \$140 a ton!
- Buy your electricity less than 2.9 cents per KWH
- Buy your heating oil cheaper than \$1.20 per gallon
- Buy your natural gas less than .90 cents / cubic foot
- Buy your propane cheaper than .78 cents per gallon

A SELF-CLEANING BOILER

Assures clean heating
Surfaces indefinitely.
No fuel waste.

HOT WATER

CLEAN

Absolutely no shoveling of coal or shaking of grates. Coal is fed automatically from **THE BIN OR HOPPER** to the fire. Ashes are dropped in a steel basket placed in the dust-tight base, out of the way and out of sight.

ECONOMICAL

Burns buckwheat sized anthracite coal costing several dollars **LESS** per ton than larger sizes.

Fire bed of live coals under constant thermostatic control prevents the needless waste of over-firing.

Burns this inexpensive fuel with scientific efficiency, feeding it from the **BOTTOM** of the fire bed which permits the gases to be fully consumed and converted into heat as they pass upward.

In ordinary hand firing about 40% of the fuel is wasted by going up the chimney in the form of unburned gases.

With the Van Wert boiler-stoker unit your fuel goes further and you get more heat per dollar.

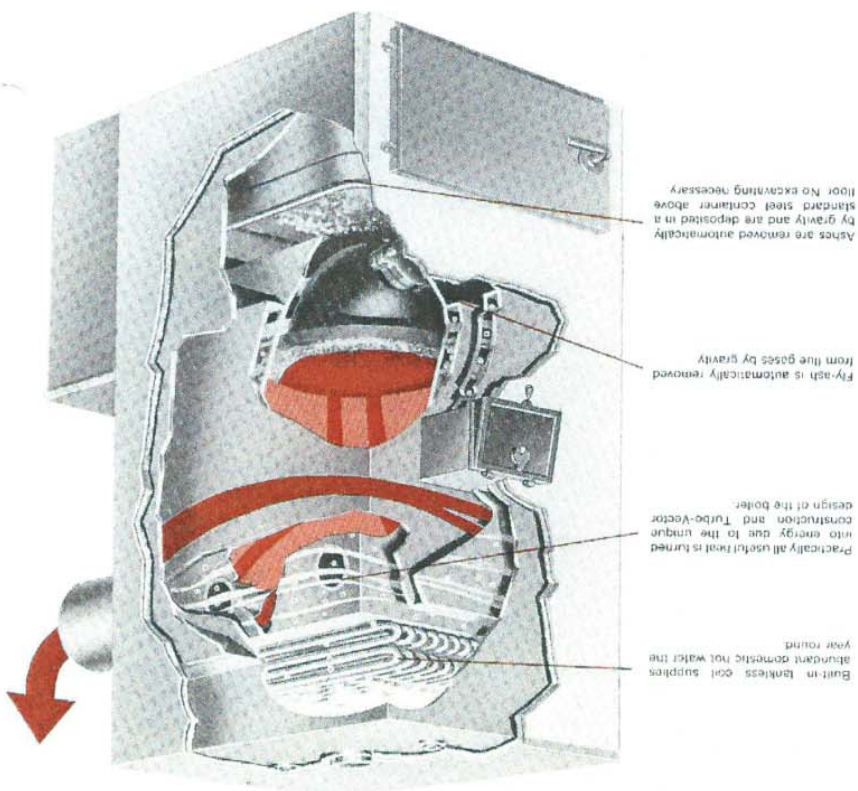

HEALTHFUL

Uniform temperature day and night. No chilly or overheated rooms. Automatically controls every function of heating with minimum attention. Fire is automatically increased or checked to conform immediately to changing weather conditions or indoor temperature.

SAFE

Odorless and smudgeless. Just the right amount of air is constantly provided for complete combustion. Everything in the coal that will burn is converted into heat.

Note the Compact, Rugged Construction
MADE IN THE USA

RATINGS & SPECIFICATIONS

MODEL	GROSS OUTPUT	NET RATING	TANKLESS	ESTIMATED SHIPPING	BTU/HR	WATER	Sq. Ft.	G.P.M.	LBS/HR	100V/60C	WEIGHT	
VA 800							172.0	1148	5.0	24	1/4	1100 Lbs.
VA 600							130.5	870	4.0	18	1/4	850 Lbs.

An additional allowance should be made for gravity hot water systems or for unusual piping and pickup loads
