SPAY/NEUTER CLINIC INFORMATION:

Your pet must not eat or drink after midnight the night before surgery.

The owner of the pet must meet briefly with the surgeon before surgery and show valid photo ID. If someone other than the owner is picking the pet up, their name must be left at the time of drop off.

If your dog does not have a current rabies vaccination one will administered the day of surgery. If your pet has been vaccinated, a valid rabies certificate signed by a veterinarian must be presented as proof – a tag is not acceptable.

Female dogs should wait 3-4 weeks from their last heat cycle before surgery. If they are in heat surgery will not be performed and will have to be rescheduled. You must notify the Vet to reschedule your appointment should this occur.

Your pet will receive a basic exam before surgery. If the animal is sick the day of surgery, a staff member will contact you and determine if they will proceed with the surgery. If any medical concerns are found it will be noted in the record and you will be notified. These medical conditions will not be treated until discussed with you and an estimate is provided. You will be responsible for the cost should you grant permission to treat.
