DESCRIPTION: Here is a pretty nice Browning quality shorter hunting bow. Bow has no delamination; no cracks; limbs are straight. On the early Nomad I, laminated wedges were used to reinforce the tips in lieu of tip overlays (see pic on p. 3). This was considered by many as a higher-end treatment. Tips are in great condition. Two (2) filled screw holes on the side of the riser (see pic). No chips or cracks. No stress lines or crazing. A few minor scratches, dings, and nicks here and there. Decal is in fair condition.
