

MAGNETIC RESONANCE IMAGING

AIM provides total MRI solutions by consulting with its clients to design specific configurations and fee programs that meet the healthcare facilities and its patient's needs. Shared Services, Lease Programs, Rental Programs, and Equipment Sales and Services is provided by AIM.

SHARED SERVICES

This consists of multiple healthcare facilities sharing an MRI Mobile Unit. AIM provides high level 1.5 Tesla MRI Mobile units, including Registered Technologists, to facilities each week. Maintenance, labor, and professional liability is covered by AIM on these programs. Fees are based on flat daily rates or fee per scan options. AIM is accredited by the Joint Commission because AIM cares about the safety and quality of its shared services.

LEASE PROGRAM

AIM can provide mobile, modular, and fixed site MRI solutions. These programs include site planning, installation, training, technical support, remote support, and maintenance. Each lease program is covered by a 95% Uptime Guarantee. The equipment is designed based on budgetary and medical demands. 1.5 Tesla and 3.0 Tesla systems are available with varying technology levels and coil packages specific to your market. Education and Training are major elements of these programs. AIM uses Altus for online training and provides Registered MRI Technologists with many years of experience to make sure your technologists are ready for the technical and safety components of providing MRI services.

INTERIM RENTAL

When healthcare facilities are installing a new MRI, upgrading an existing system, or need an extra MRI system to cover patient overflow, AIM can provide Mobile MRI systems for such events. 2 weeks to 12 months rental rates are available. Transportation, site planning, installation, technical support, and maintenance is included with each rental.
