

**Parkinson's Disease** Parkinson's disease is a progressive disorder of the nervous system that affects movement. It develops gradually, sometimes starting with a barely noticeable tremor in just one hand. But while a tremor may be the most well-known sign of Parkinson's disease, the disorder also commonly causes stiffness or slowing of movement.

As a caregiver, you'll need to pay close attention to the person's family life, job situation, and financial and legal needs. We understand that with all of life's many challenges that sometimes extra help in the home is needed. Let **Horizon Health Network** be your first call to provide that help and support in your home life.
