

“There have been so many wonderful things David has provided for all of us and my self alone in the class and outside of it. Taking the time to meet with all of us before fall break just to catch up on where we are at in the work and even what we want to do outside of school that was really helpful. The journals are a great way to get all our thoughts onto a page as to not miss a moment we experienced in class. And his feedback in my journals really brought insight to any questions I may have had and encouragement. He always starts and ends the class on good high spirits and makes you want to come to class to see what he'll bring out in you next. He's passionate about our individual work and that makes me more passionate about it.”

“It's really nice being in David's class because it is very clear that he wants to be there. He talks about applying this work to our shows and we do a significant amount of work with our monologues and sonnets, so that is nice.”

“David made class fun and exciting each day! He stressed the importance of practical application. I have been able to see an improvement in both class and outside of class in auditions. I have loved this class! I have a bodyyyyy!”

“This class has definitely helped me in improving the use of my body when acting. I really found the use of the gestures helpful.”
