

“ TEAMWORK MAKES THE DREAM WORK ”

## INTRODUCING:

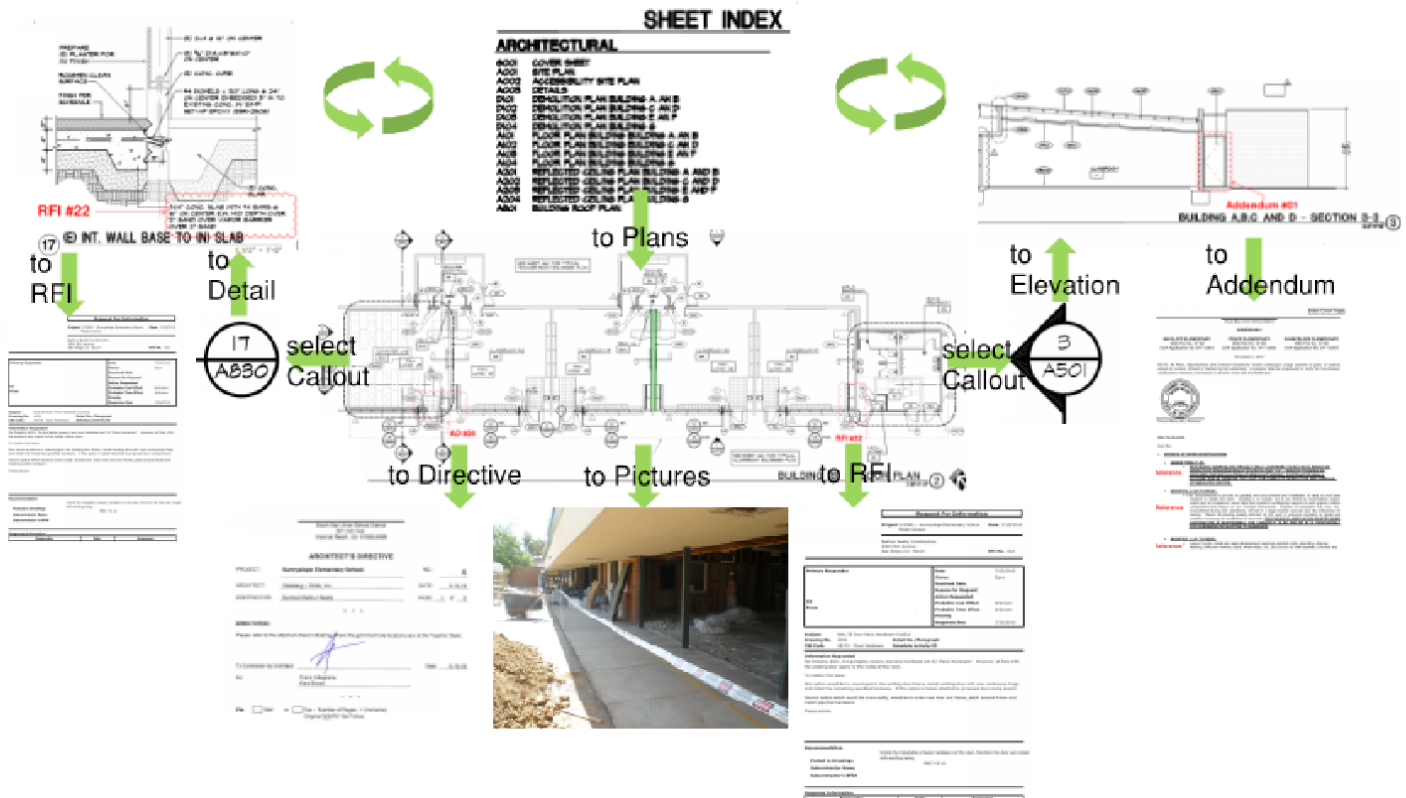

## INTERACTIVE DOCUMENT SETS

Don't let your competitors gain the technological edge. Get assistance with the newest construction software in the industry, Interactive Document Sets. View your plans like never before from any type of computer device.

What are Interactive Document Sets? Interactive Plans enable you to quickly jump from one plan (or document) to the next without flipping through each page or having to scroll through thousands of pages. This will save you an enormous amount of time. Instead of having to manually go through all of this information, a few precise clicks will get you where you want to be.

Any document can be linked and referenced :

- Specification
- RFIs
- Addendums
- Directives
- Shop Drawings
- Submittals
- Change Orders
- Schedules
- Meeting Minute Item
- Field Reports
- Punch Lists
- Pictures
- Inspections
- Tests
- Agency Information

Now take this a step further than your office and go mobile with this special tool. Start using your mobile device while in the field or away from the office. Learn how to use your iPad (or tablet PC) to access, edit and navigate your PDF files on the go, from anywhere. Eliminate the need to print plans by setting up a digital plan room allowing documents to be accessed via iPad. Store, edit and mark up plan documents while in the field. Congratulations!

Interactive Document sets also are great for owners and facility managers. Set up linking to O & M Manuals for ultimate referencing tool. Being able to start with a site plan and after a few clicks end up at the HVAC unit you are trying to get to is a sophisticated tool.
