## **FIRE CONTROL TEST SME – FAIRFAX, VIRGINIA**

**WEBCO HR, Inc.** is seeking a Fire Control Test SME for one of our clients located in Fairfax, Virginia.

### **SUMMARY:**

Keeping people safe worldwide is what our client does. Developing mission-critical systems is how they do it. At this company, you'll be part of the team that helps heroes make a true impact. The work they do is important. The challenges they face are career defining. The opportunity they can offer is one-of-a-kind. They are ready to hire a Fire Control Test SME for the trainers team who delivers cutting edge training systems to the submarine fleets of both the US Navy and Royal Australian Navy. Their work is fast-paced and exciting, and often involves integrating software builds that are not yet complete in order to deliver training for systems and capabilities that are not yet present in the Submarine Fleet. Training is deployed to Navy Bases including San Diego, Pearl Harbor, Bangor, Norfolk, Groton, Kings Bay and Perth, Australia.

### **RESPONSIBILITIES:**

- Supports design, implementation, and maintenance of lab and server room hardware and equipment.
- Designs, develops, analyzes, troubleshoots and provides technical skills during research and product development.
- Develops, implements, installs, tests, modifies and or operates complex equipment and systems.
- Develops and executes test plans onsite to prepare training systems for delivery.
- Develops and executes system verification test documentation at customer sites to sell-off deliverable systems.
- Effective creative application of technical competence within domain of expertise.
- Effectively participates on the engineering work team and supports other team members concerning experiment design, materials, equipment setup/maintenance and related issues.
- Formulates and recommends corrective action measures such as schedule revisions, manpower adjustments, fund allocations, and work requirements.
- Instructs in the operation and maintenance of the system, providing technical expertise to customers, users, and company personnel.
- Participates in the tactical planning for completion of identified project segment.
- Serves as technical support resource with a demonstrated level of narrowly focused technical competence within defined engineering discipline.

### **REQUIREMENTS:**

- Experience with the AN/BYG-1 Combat Control System.

- Experience working with the Submarine Warfare Federated Tactical Systems (SWFTS Community).
- Works on problems of moderate scope where analysis of situations or data requires a review of a variety of factors.
- Builds productive internal/external working relationships.
- Considerable professional expertise, applies company policies and procedures to resolve a variety of issues.
- Demonstrate competent level of theoretical and practical knowledge within a defined engineering support discipline.
- Shows initiative on assignments, exercises independent judgment and professionally executes projects with little direction.
- Demonstrate considerable communications skills.
- Demonstrate creativity in resolving process and technical issues.
- Demonstrate narrowly focused in-depth technical level of practical operational process knowledge in a specific engineering area.
- Demonstrates technical competence in the setup, monitoring and documentation of experiments and/or lab equipment.
- Travel will be required.
- Security Clearance Required.

**Preferred Experience:**

- Experience with Navy Submarine Design.
- Experience with AN/BVY-1.
- Experience with AN/BQQ-10.
- Experience with AN/BLQ-10 .
- Basic Linux command line navigation skills .
- Experience with Security Engineering.
- Experience on an Agile-Waterfall Hybrid Program

**COMPENSATION:**

- Base Salary
- Full Benefits
