

CAPABILITY STATEMENT

Platinum Geomatics provides Land Surveying, Aerial Surveying, Photogrammetry, LiDAR, Remote Sensing, GIS and UAV/UAS services to architecture and engineering (A/E) companies, land developers, utility companies, federal, local, and state governmental entities. Known for outstanding professional services, responsiveness and commitment to the latest technology, Platinum Geomatics strives to constantly bring technology and innovation to the geospatial profession and deliver it to our clientele on time, right the first time.

As a small Minority-Owned and Disadvantaged Business Enterprise (MBE/DBE) Platinum Geomatics seeks to add value to its teaming partners in federal and state government teaming agreements.

Platinum Geomatics Primary Target Markets

Transportation | Aviation | Electric Utilities | Pipelines Commercial Site Development | Local Government State Government | Federal Government Residential Development

Consulting

At the heart of our mission is consulting. Platinum Geomatics is founded on providing subject matter expertise, consulting services and data provision to our loyal clientele.

Technology

Our technology solutions focus on the latest advances in land surveying and aerial photogrammetric capabilities. By incorporating the tried and true principals of land surveying with the latest terrestrial scanner technology we ensure the best, most accurate land surveying data coupled with the most efficient and innovative means in which to collect data. Similarly, we employ the proven methodologies of photogrammetric data collection and have integrated those best practices into the recent advent of Unmanned Aerial Vehicles (UAV) "drones" and Unmanned Aerial Systems (UAS) technology to provide efficient and cost effective remote sensing capabilities. In addition to this latest technology, we have aerial LiDAR collection and processing expertise and photogrammetric data acquisition capabilities.
