

# **Creating Opportunities for Independence: Bluetooth and Infrared Technology Improving Access**

**Length:** 2 Hours

**Description:**

Enhancements in power wheelchair electronics can bring new levels of independence for a consumer however keeping up with the changes is an on-going process. The Q-Logic 3 system has enhancements that truly allow the power wheelchair to be tailored to the individual significantly. This course provides a hands-on approach to head array and mini proportional joystick programming can be programmed to provide maximum benefit.
