

HW 2.3 Distribution and Solving

Choose any TWO columns to complete as homework.

1. $x + 4x = 15$

2. $2(3x + 4) = 16$

3. $x + 2 + x = 4$

4. $5x - 3x = 14$

5. $5(x + 3) = -30$

6. $2(2x - 1) = 2$

7. $5(x - 4) = 10 + 10$

8. $18 = 2(x + 4)$

9. $3(5x - 1) = 12$

10. $-2x - 3x = -25$

11. $3(2a - 4) + 2 = -10$

12. $5(x + 2) - 5 = -15$
