

# LADYBUGS

Birth to One Year

The infant room teachers strive to provide a stimulating, safe and caring environment for the babies. Physical contact such as hugging, cuddling, and TLC are an important part of the day in the nursery. The room, toys, and furniture are disinfected multiple times daily to help stop the spread of germs. The curriculum contains daily age appropriate activities in which staff will talk, sing, play, move, and incorporate sign language into the learning.
