

Honeycomb Shades

Features

- > Color choices include over 200 options from whites, neutrals, and muted tones, to bold colors and exclusive prints
- > Fabric opacities range from sheer and semi-sheer to blackout, offering privacy and light control versatility
- > 100% stain-resistant polyester fabric is wrinkle-resistant and easy to clean and maintain – most fabric styles are completely washable
- > Offered with a wide selection of control options, including Top-Down/Bottom-Up, continuous loop, cordless lift, vertical application and motorized control to fit any need
- > Most shade styles are completely washable
- > Limited lifetime warranty ensures your customers' satisfaction

Pleat Sizes and Styles

- > 3/8" single pleat for small scale windows
- > 3/4" single pleat for standard and larger windows
- > 1/2" double cell pleat for added insulation and energy efficiency
- > Triple cell for superior energy efficiency, rich color saturation

Many styles fit widths and heights of up to 174" with no seams or overlaps.

Fabric Choices and Opacities

- > Sheer fabrics – offered in two neutral colors, softly diffuse incoming light and provide a degree of UV protection
- > Semi-sheer fabrics – offered in soft, muted tones, further diffuse light and provide a textured appearance and moderate degree of privacy
- > Semi-opaque fabrics – offered in a wide selection of solids, patterns, and printed textures, dramatically reduce incoming light and significantly enhance privacy
- > Blackout fabrics – offered in a range of colors from whites and neutrals to rich, deep colors, block up to 99% of incoming light and provide complete privacy

Control Options

> TWO ON ONE HEADRAIL

Two shades placed side-by-side that can be operated independently.

> TOP- DOWN AND TOP-DOWN/BOTTOM UP

Lowers shade from the top down and/or lifts the shade from the bottom up to provide complete privacy and light control flexibility. A fabric gasket enhances light blocking between the headrail and moving rail.

> TWO FABRIC COMBINATION

Combines two fabrics on the same shade to offer two different styles and enhance light control versatility.

> CORDLESS LIFT SYSTEM

Lifts and lowers shades with ease. Eliminates lift cords making them safer for children and pets. Headrail colors complement the fabric. Bottomrails are color-coordinated with the fabric, but can be ordered to match the headrail color if desired.

> CONTINUOUS CORD LOOP

Easily lifts large, hard to reach shades, and provides exact shade positioning with no dangling cords.

> REMOTELIFT BATTERY-OPERATED MOTORIZATION

Infrared (IR) motorization system that lifts and lowers shades from up to 30 feet away with the touch of a button. The headrail is offered in white and cream colors. Bottomrails are color-coordinated with the fabric, but can be ordered to match the headrail color if desired.

> ARCHES

Stationary, movable, and top-down arch styles available to fit most arch-style openings.

> SPECIAL SHAPES

Shades can be customized to fit most any shape, including angles, circles, hexagons, and more.

> SKYLIGHT

Easy-to-operate system covers most skylight applications.

> VERTICAL APPLICATION

Honeycomb pleats are oriented vertically and shade opens side to side and stacks in a 6 1/2" space – perfect for sliding glass doors and room dividers.

Hardware and Installation

- > Sleek, low-profile headrail – allows shades to stack tightly. Color-coordinated rails, cordlocks and cords enhance the shade's appearance.
- > Positive lock tab brackets – are easy to install and hold shades securely in place.
- > Snap-in brackets – provided for shades with upgraded control options.
- > Swivel brackets, spacer blocks, extension brackets, and hold down brackets – also available for installation flexibility.
