

Anagramania

In this puzzle, one third (16) of the answer words have to be anagrammed into a new word before they are inserted in the grid. Another third (16) of the questions have to have one of their words anagrammed into another word in order to be able to properly solve the clue. The other third (15) of the clues are normal and the answers can be entered directly into the grid without alteration.

The 47 clue answers and the 16 other words that are entered in to the grid include 5 capitalized words.

Punctuation in the clues provides grammatical correctness and may or may not help the solver.

When you have finished, the letters in the shaded squares, reading top to bottom, will provide an appropriate description of you.
