

DISHWASHING DETERGENT

YJ-370

DISHWASHER RINSE AID

- ✓ High concentration
- ✓ Ensures uniform drying, mark free
- ✓ Effective in water with hardness up to 80°C

WHAT IT IS FOR

Rinse additive with acidic pH for final rinse of dishes. Its special formulation means it is suitable for general use in water with hardness values up to 80°C. It ensures uniform drying, mark-free.

RECOMMENDED DOSAGE

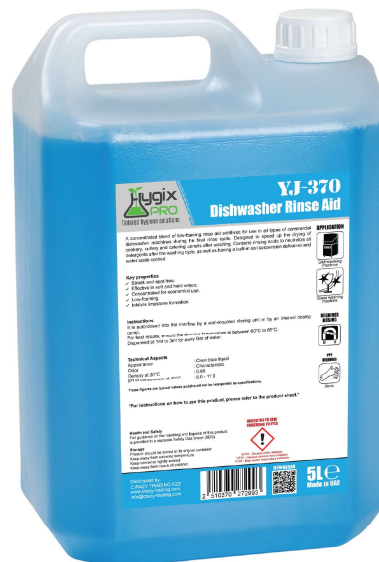

0.5 to 1.5g per litre of water, depending on the hardness of the water. Supported by an Automatic Dosing Unit.

USE

Use only in professional dishwashers or cup washers by dosing the established dose directly into the dishwasher using automatic dosing systems.

AVAILABLE PACKING

4x5liters / 20liters / 25liters

Dishware/utensils cleaning

Glassware cleaning

Dishwashig machine
