

# Miguel's Cocina

---

(Carlsbad, CA) Using RGB color tunable light to up-light this drop ceiling creates a brilliant ambiance, and allows the bar to be a focal center in the restaurant. Miguel's Cocina in Carlsbad, CA opened to oohs and aahs as patrons tasted some of the finest Mexican food this side of the boarder! Designer Mike Hatch and the owners of Miguels brought in Numinus to help create this effect. Using the NuLEDs serial controller on a Control4 System installed by Onteriors and Apex Lighting Electric, we dialed in the red, green and blue values (RGB) to create a color that matched the paint color. We also ran warm white LED strip light under the bar, and have recessed cans both up-lighting and down-lighting throughout the restaurant.
