The purpose of this illustration is to suggest that the core city layout of Rome appears to match that of the Cydonia, Maris Pleiadian pyramid complex. There are several key correlation that suggest this. One is that the 3 motifs are present with the pentagonal 'Castle of the Angels' or fortress, Saint Angelo. Then there is an exclusive horse track or elongated track that corresponds to the Face of Ala-lu. Lastly there is the 7 Hills of Rome that correlated to the 7 stars of the Pleiades.

Within the Roman Forum a more accurate rendition of the Cydonia pyramid city complex is presented. In this detail, the center fulcrum is the Colosseum. It is at the center of the pentagram geometric design layout as it is found in Mars within the Pyramid City. In-between this star map and the Vatican is the Campus Martius or the Plane of Mars.
