Sing and play
Everyday!

SING

Singing and talking with infants and children helps brain development and social skills.

PLAY

Singing and talking during routines is powerful! Try during playtime, feedings, in the tub and diaper changes!

CONNECT

Shared positive language between parents and children has the power to improve vocabulary, learning and social skills.

We believe parents have the tools to create quality language experiences through song and play.

Follow **teenytunesorg** on Instagram and submit a video of you and your child singing and playing to be the next Rockin' Role Models!
