PLOW BOLTS

G-8 PLAIN #3 HEAD

- Heat treated to provide improved wear resistance and extend the life of the bolt.
- Used on many types of heavy construction equipment such as snowplows, road graders and scoop shovels.
- 3/8", 7/16" & 1/2" are Flat head style.
- 5/8" and 3/4" are Dome head style.

EYE BOLTS

PLAIN PATTERN

- 1030 CARBON STEEL • DROP FORGED • HEAT TREATED
- Eyebolts are processed and tested to the required mechanical properties below. Tests are performed on randomly selected eyebolts from a given production run.
- Shanks threaded full to within 1/8" - 3/8" of eye.
- When load application is in direction of axis of shank, rated capacity figured with factor of 5 to 1.

J&B #	(A) THREAD DIAMETER	(B) SHANK LENGTH	(C) I. D. EYE	RATED CAPACITY IN LBS.	QTY
38436	1/4-20	1	3/4	440#	10
38437	5/16-18	1-1/8	7/8	720#	10
38353	3/8-16	1-1/4	1	1080#	10
38354	1/2-13	1-1/2	1-3/16	1960#	10
38355	5/8-11	1-3/4	1-3/8	3160#	5
38356	3/4-10	2	1-1/2	4600#	5

APPLICATION:

- (a) Do not use eyebolts on angular lifts unless absolutely necessary.

Plane of
the Eye

- (b) Loads should always be applied to eyebolts in the plane of the eye, not at some angle to this plane.
- (c) To obtain greatest strength from an eyebolt, it must fit tight in the hole into which it is screwed to prevent unscrewing due to twist of cable. Tightness and seating must be checked after initial load.
- (d) Eyebolts should never be painted or otherwise coated when used for lifting, as such coatings will very likely cover up flaws.
- (e) To attain the rated capacity listed for regular eyebolts, full thread engagement allowing 1/2 turn for alignment to the plane of the eye is necessary.

MECHANICAL PROPERTIES:

Grain Size	.5 or Finer
Tensile	65,000 PSI MIN
Yield	30,000 PSI MIN
Elongation	30% MIN
Reduction of Area	60% MIN
Rated Capacity	(See Chart for specific size & load)
Bend Test:	No visible surface ruptures in unthreaded section of eyebolt when bent to 45° with full thread engagement.

WARNING: Rated capacity is drastically reduced when loading at any angle. Loading must never be made at an angle greater than 45° from bolt centerline. At angle of 45° rated capacity is reduced to 1/4 of the tabulated value.

BENT EYE BOLTS

- Carbon steel; zinc plated.
- Furnished with hex nuts (unassembled).
- All sizes manufactured with rolled threads.

J&B #	THREAD DIA.	OVERALL LENGTH	SHANK LENGTH	THREAD LENGTH	I. D. EYE	QTY

* **Not recommended for lifting.**

HEX FLANGE CAP SCREWS

GRADE 8 (Phosphate & Oil Finish)

- Heavy truck, tractor and trailer fastening system that cuts assembly, maintenance and repair costs.
- The flange bolts and locknuts form a 150,000 p.s.i. tensile strength equivalent to 10.9 in metric.
- Fastening system reduces the need for costly hole preparations such as deburring & countersinking.

- Extra length for universal application.

BOLTS

U-BOLTS Zinc Plated

- Each U-bolt comes with plate and hex nuts.
- Designed for hanging or fastening products to pipe, wood, etc. Bolts are suitable for automotive, plumbing & other home and industrial applications.
- Do not use for overhead lifting, support of human weight, or athletic equipment
