

DT Roller Presses

DariTech, Inc., offers a variety of roller press options to fit the press needs on your dairy. Whether pressing just to make a nice stack of solids or for use as green bedding, we have just the right press for the application.

DT Roller Press

The **DT Roller Press** is manufactured with heavy duty construction for longevity and strength against the most heavy duty applications. The press rolls are designed with advanced gum roller vulcanization and are each individually driven to prevent slippage and stalling from large objects. Our DT Roller Press also has reinforced backing on the screen roller for added strength as well as a remote grease bank.

DARITECH 2 Roller Press (weighted)

Features include:

- Economical design
- Counter weight press design
- Designed for use with a DT360 Rotary Screen Separator or smaller dairies with a DT-X Separator
- Expected dry matter 16-20%

DARITECH 2 Roller Press (air bag)

Features include:

- Direct drop-in upgrade replacement for weighted 2-roller
- Designed for use with DT360 Rotary Screen Separator or smaller dairies with a DT-X Separator
- Air bag press to create a dryer product
- Expected dry matter 22-26%
- Heavy duty oversized bearings and shafts

DARITECH 4 Roller Press

Features include:

- Designed for use with DT360 or DT-X
- Individual air bag pressure to control dryness and feed speed between sets of rollers
- Expected dry matter 30-35%
- Product usable as green bedding
- Heavy duty oversized bearings and shafts

DARITECH 2 Roller Press (6 ft)

Features include:

- High production press
- Designed for use with two DT360's or DT-X
- Air bag to create a dryer product
- Expected dry matter 22-26%
- Heavy duty oversized bearings and shafts
