

Carmine Nardis
Founder and President, NY, USA

Carmine is the founder of AvantisIT LLC - *a New York-based innovative advisory & solutions provider supporting the strategic Information Technology, Operational & Growth needs of Family Offices, Private Investment firms and technology-oriented start-ups.*

Prior to AvantisIT, Carmine enjoyed a long successful career holding various senior level Information Technology positions (ranging from IT Director to Global CIO - Chief Information Officer) in multinational companies like Havas Media and Young & Rubicam. As such, Carmine has had the privilege to be intimately involved in technology from the era of mainframes to the latest mobile and artificial intelligence trends.

Carmine, a self-starter and visionary leader with an acute focus on '*solving the business challenges*', devised the thriving business model for AvantisIT LLC understanding the critical & strategic role that IT plays in '**advancing the business**' by enabling growth, gaining competitive advantage, increasing efficiency and contributing to the 'bottom-line'.

This business philosophy was also the foundation for developing **IT4Wealth®** (*the company's flagship system*) as a leading integrated Software Solution for Family Offices and Private Investment firms with the main focus of helping its clients **AUTOMATE & STREAMLINE IN A SINGLE PLATFORM** the core operational capabilities while keeping control of the **DATA IN HOUSE**, achieving significant **EFFICIENCY**, and at a **REASONABLE COST**.

Carmine leads his team in making **IT4Wealth®** a **TRUE PARTNER** to its clients (*continuing to automate processes and work-flow*) and ensuring **IT4Wealth®** is a **SOUND CHOICE** for those in the Family Offices industry (*robust capabilities, cost-efficient fees and customization flexibility*).

In addition to serve as the President at AvantisIT, LLC he also heads the company's software engineering, development & technical support team.

Carmine has served in various Business Boards and has a long standing & active participation in Engineering organizations, Executive advisory forums and the Mentor program at Columbia University, his alma mater for both his Electrical Engineering degree and his Masters in Computer Science.

He is multi-lingual (English, Italian, Spanish), and has a passion for Innovation, knowledge, philanthropy, travel, history & soccer.
