

## Hologram

### Circle Destruct Tamper Evident Holographic Label

The Circle Destruct Tamper Evident Holographic Label starts out life as a standard Hologram Label with a few enhancements. When you attempt to remove the label from the object that is adhered to the label will destruct in the pattern shown above with a alternating weak and strong adhesive. The metalized layer is alternately patterned with two adhesives that will alternate between a) weakly attach to the clear PET carrier of the hologram and strongly attach to the substrate in a checkerboard pattern, and b) strongly attached to the PET carrier and weakly attach to the substrate in a checkerboard pattern. This can be seen from the example in the figure

Before

After Tampering

## **FEATURES: Circle Destruct Tamper Evident Holographic Label**

- Low cost
- Simple to use
- Easy to Detect.
- Works well on many different surfaces.
- Example is shown using SECURE GENUINE Holographic effect.
- Available in Metalized or See-through hologram.
- Customized Artwork available: including
  - a) Holographic Latency image.
  - b) 3- Dimensional Holographic effects
  - c) Company specific logos
- Customized dimensions available.
- Customized Laser Etching and serialized barcode available
