

INDICATIONS FOR A THERMOGRAPHIC EVALUATION:

Alphabetic order

Altered Ambulatory Kinetics	Nerve Entrapment
Altered Biokinetics	Nerve Impingement
Arteriosclerosis	Nerve Pressure
Brachial Plexus Injury	Nerve Root Irritation
Biomechanical Impropropriety	Nerve Stretch Injury
Breast Disease	Nerve Trauma
Bursitis	Neuropathy
Carpal Tunnel Syndrome	Neurovascular Compression
Causalgia	Neuralgia
Compartment Syndromes	Neuritis
Cord Pain/Injury	Neuropraxia
Deep Vascular Disease	Neoplasia
Disc Disease	(melanoma, squamous cell, basal)
Disc Syndromes	Nutritional Disease
Dystrophy	(Alcoholism,Diabetes)
External Carotid Insufficiency	Peripheral Nerve Injury
Facet Syndromes	Peripheral Axon Disease
Grafts	Raynaud's
Hysteria	Referred Pain Syndrome
Headache Evaluation	Reflex Sympathetic Dystrophy
Herniated Disc	Ruptured Disc
Herniated Nucleus Pulposis	Somatization disorders
Hyperaesthesia	Soft Tissue Injury
Hyperextension Injury	Sprain/Strain
Hyperflexion Injury	Stroke Screening
Inflammatory Disease	Synovitis
Internal Carotid Insufficiency	Sensory Loss
Infectious Disease (Shingles, Leprosy)	Sensory Nerve Abnormality
Lumbosacral Plexus Injury	Somatic Abnormality
Ligament Tear	Superficial Vascular Disease
Lower Motor Neuron Disease	Skin Abnormalities
Lupus	Thoracic Outlet Syndrome
Malingering	Temporal Arteritis
Median Nerve Neuropathy	Trigeminal Neuralgia
Morton's Neuroma	Trigger Points
Myofascial Irritation	TMJ Dysfunction
Muscle Tear	Tendonitis
Musculoligamentous Spasm	Ulnar Nerve Entrapment
	Whiplash
