

**Total Access Control  
and Photo ID Badging  
from IDenticard**

**IDenticard®**  
ACCESS CONTROL

# Solutions for Facilities of All Sizes

Whether you need access control for a small office building or to provide a complex network of facilities with world-class card access security management, **PremiSys™ is your total access control solution.**

*Dynamic Mapping makes it easy to pinpoint the exact location of a door in alarm.*

*The PremiSys Mobile App for access control gives system administrators the freedom to manage security activities remotely, including acknowledging alarms and instantly locking down doors.*

## PremiSys™ Pro

- For enterprise solutions controlling more than 40 doors or using more than three workstations
- Includes full-featured ID badging software
- Enhanced elevator controls for multi-floor buildings
- Mobile app for access control and badging available

## PremiSys™

- Ideal choice for facilities controlling fewer than 40 doors or using three or fewer workstations
- Includes full-featured ID badging software
- Easily expands as your company's security needs change and grow
- Mobile app for access control and badging available

## PremiSys™ LT

- Feature-rich, entry-level solution for up to eight doors
- Easily expands as your company's security needs change and grow
- Mobile app for access control available

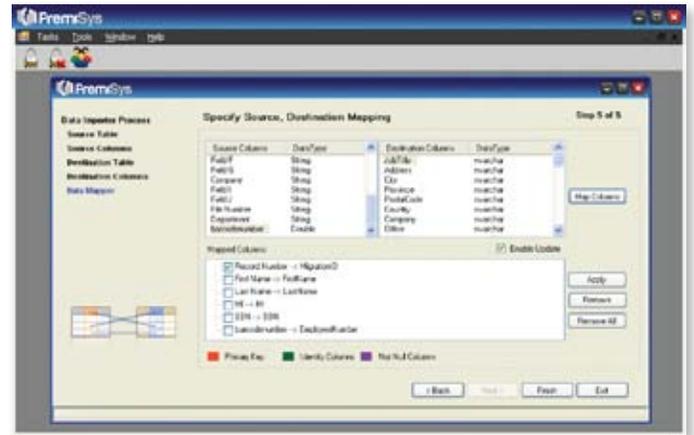

# Cardholder Management

**IDenticard's Cardholder Management Module** is the personal ID badging system designed for security-minded professionals.

- Customizable badge designs, screen designs and database fields.
- Photo Recall instantly identifies cardholders as they use their cards to access doors.
- Mobile app available.

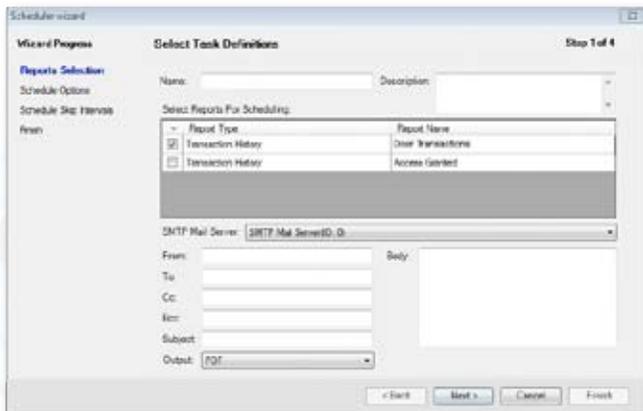

*PremiSys Mobile App turns your smartphone into a mobile enrollment station.*

*Connect to and import data from an existing database (SQL, MS Access, delimited text file).*

# Reports

*Easily generate and e-mail customized reports using the PremiSys Scheduler Wizard.*

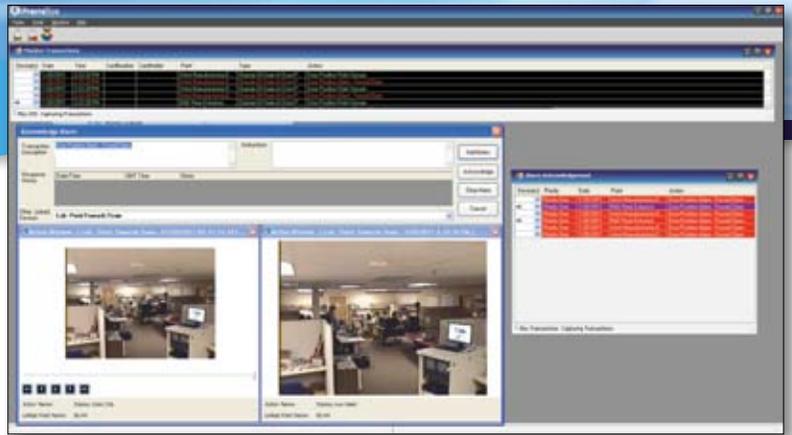

*Variety of card options include advanced laminates, oversized cards and credentials, secure custom printing, and multiple stock options.*

# Security Integrations

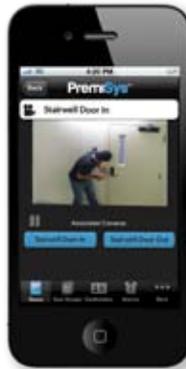

## Video Management Systems (VMS)

IDenticard® teams with leading video manufacturers to provide a robust and flexible access control and video surveillance solution.

- Display live and recorded video side-by-side when reviewing alarm acknowledgements.
- Dynamic Mapping includes clickable icons to indicate camera locations and open live video.
- Mobile App available for some VMS systems.

*View recorded video from Transaction and Alarm Acknowledgement windows, and Transaction History Report (see above).*

*View live and recorded video without being on-site (see left).*

## Readers

IDenticard offers a variety of card reader technologies – including proximity, smart card, biometrics, magnetic stripe and bar code – from leading manufacturers to create a flexible security solution that meets your requirements.

## Electronic Locks

Provide a wireless integrated door lock solution that is efficient and cost-effective by eliminating the need to run wires to the door. Network hardwired locks are also available.

## Visitor Management

Assign visitor access rights through your Visitor Management system. Ask your representative for compatible systems.

## FIPS 201 Compliance

PremiSys™ integrates with PIVCheck from Codebench to provide an HSPD12/FIPS 201 compliant solution. PremiSys performs card validation, authentication and registration of the card's information, and links a legacy card (e.g. proximity card) and the FIPS 201 credential in the same cardholder record during registration.
