

PartPic Part Locator

PartPic software is a Windows based inventory control solution optimized for use with Remstar brand carousels and vertical lift modules.

The system supports consumable and non-consumable inventory. Consumable inventory allows you to manage stock levels and non-consumable inventory allows you to track the item in and out of storage. The location of the item is maintained and the transaction history is available.

A PC-based Inventory Control application for use with Remstar ASRS equipment

User ID	Last Name	First Name	S	R	B	Last Access
BOB	Ballard	Bob		✓		2/11/2016
PLH	Howell	Pete		✓		2/11/2016

2/12/2016 3:56:22 PM	Return	Ballard, Bob
2/12/2016 3:55:34 PM	Borrow	Meaner, Tom

The **PartPic Server** option allows operators to enter Part Numbers and access quantities directly on the carousel when the Robey Controls OP7 keypad is installed. Alphanumeric part numbers can be entered on the touch-panel, a side-mounted QWERTY keypad, a barcode scanner, or even a smart phone! Operators interface with the carousel, instead of the PC.

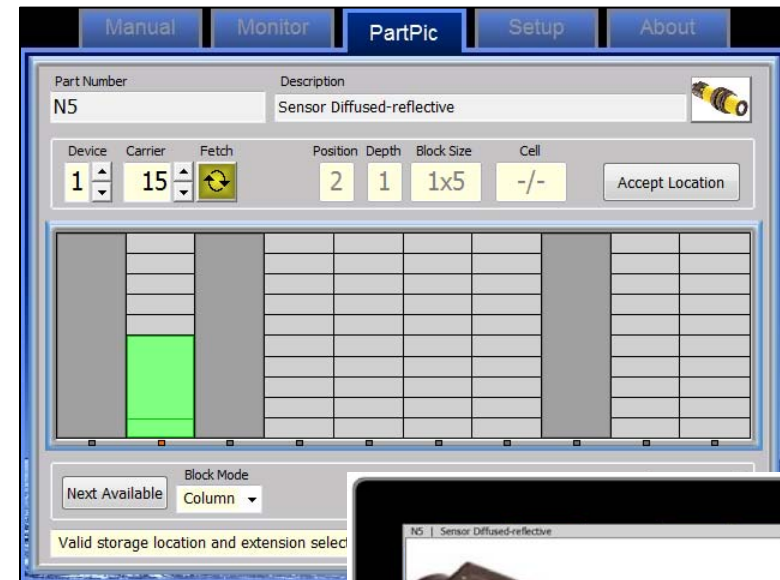

Features & Benefits

- Remstar® ASRS interface drivers
- Runs on Windows™ XP/7/8/10
- PartPic Server option
- Report printing, with graphics
- Ethernet & RS232 interfaces
- Supports touch-screen PC
