

Next Generation- The Sette™ Series

Introducing a new conical burr series that debuts a revolutionary new grinding technology. This technology sets a new standard in simplicity, efficiency, and durability.

Unique Features:

- Outer burr rotates and the inner (fixed) burr doubles the efficiency of similarly sized grinders.
- Incredible repeatability: the macro/micro mechanism is directly connected to the cone burr, resulting in immediate and true grind adjustment.
- Convertible device holder allows grinding directly into your Portafilter, supplied grounds bin, or most of the popular brewing devices (Hario, Clever, Able Kone, Aeropress).
- Speed of grind espresso 3.5 g/sec. and manual brew 5.5 g/sec.
- Weighing technology of Acaia gives precise and accurate weight- based dosing.
- Bluetooth capabilities designed by Acaia.

Options:

Sette 270 (time-based dosing) MAP \$379

This grinder is an all-purpose grinder using time-based dosing.

Sette 270W (weight-based dosing) MAP \$499

This grinder was designed using the weighing technology of Acaia, giving precise and accurate weight-based dosing, with the revolutionary ability to grind by weight directly into a portafilter, a first for the home espresso enthusiast! In addition, the 270W comes with Bluetooth capabilities.

Etzinger Burr Mechanism

We have been working with Etzinger engineering, a conical burr manufacturer in Lichtenstein for many years. They have developed an innovative grinder technology setting a new standard in simplicity, efficiency, and durability. At its core the mechanism is a straight-thru grinder. Coffee passes through the grinder vertically, and drops directly into the grounds bin or portafilter. There are almost no residual grounds in the system and the coffee is actively transported into and out of the grinder, not relying simply on gravity. Ground coffee retention is kept to a minimum assuring every grind is as fresh as possible.

Acacia Weight Technology

In response to customer requests for grind by weight for espresso, we have collaborated with the renowned smart coffee scale company, Acaia, to design a grinder that gives you the ability to precisely and accurately grind by weight directly into a portafilter. In line with Acaia’s strength of designing supporting apps, this grinder will come with Bluetooth capabilities. The weighing technology and the Bluetooth capabilities are related and offer many features including:

- Tracking the current and lifetime weight of coffee ground, and guiding maintenance planning
- Controlling settings within the grinder via a preset value adjustment and starting/stopping the grinder
- Smart running dose offset calibration

Specifications:

Speed To Grind	Espresso 3.5 g/sec Manual Brewing 5.5 g/sec
Burrs	40 mm steel conical burrs
Bean Hopper Capacity	10 oz (300-400 g)
Grounds Bin Capacity (Med Roast)	6 oz (160g)
Weight	7lbs (3.2kg)
