

Cardio 911™ OraChelate Formulated with EDTA to support arteries and the entire circulatory system based on the well researched compound ethylenediaminetetraacetic acid (EDTA), which has shown in clinical studies to bind metal ions in the arteries and veins through its powerful chelating capability. Methyl-Sulfonyl-Methane (MSM) and N-Acetyl-Cysteine (NAC) are two sulfur-donating compounds that increase cellular glutathione concentrations, which is important for increased antioxidant needs. Along with Vitamin C, these compounds work together to provide optimum nutritional support for cardiovascular health.

CAUTION: Do not exceed recommended dose. Pregnant or nursing mothers, children under the age of 18, and individuals with a known medical condition should consult with a physician before taking this or any dietary supplement.

KEEP OUT OF REACH OF CHILDREN. Do not use if safety seal is damaged or missing. Store in a cool, dry place.
