SIGN-UP

Sign up for STEAM classes in the Preschool Office. Space is limited and will be filled on a first-come-first-served basis

Brain Building with STEAM

Science is a way of thinking - observing, experimenting, making predictions, sharing discoveries, asking questions and wondering how things work.

Technology is a way of doing – using tools, being inventive, identifying problems and making things work.

Engineering is a way of doing – solving problems, using a variety of materials, designing, creating and building things that work.

Art is a way of doing – communicating, being creative, exploring color and space, using a variety of materials.

Math is a way of measuring – sequencing, patterning, exploring shapes, volume, and size.

Themes for each week can be found on school website.
