DRUG RECOVERY FOUNDATION

Our Mission as a Christ Centered drug recovery foundation, is three-fold.

Firstly, as Addictions Educators, we emphasize scientific research that documents how drugs change the brain by inducing mental disorders and disease. Another core mission is to revolutionize, Parental Grief Counseling, by utilizing cutting-edge techniques that rapidly and effectively teaches parents how to break illogical grieving patterns related to a family member with diagnosable *Substance Use Disorder (SAD)*, or *Compulsive Drug Use or Addictions*.

Addictions Education

Our Addictions Education, is based on new scientific facts that clarifies *Substance Abuse Disorder (SAD) as a progressive disease, or expanding mental disorders*. We have a research team that studies, collects and compiles data from recognized national institute, such as, SAMHSA, CDC, NIDA, HHS.gov, NIH (*The National Institute on Drug Abuse*) NIM (*National Institute of Mental Health*).

We are dedicated to building an extraordinary educational classroom that promotes brain wellness as the first step in drug recovery. We discourage aloof, computerized, Addiction Education void of personal interaction.

Christ Centered: Parental Grief Recovery

This is a new day and we are breaking down the walls of yesterday's grief counseling, and introducing newer resources and opportunities. Our methods are interactive our theme is grace based and our actions are interactive. We will do luncheons and dinners where our special guest speakers will include a long list of Addictions Specialist, Educational Experts, or highly esteemed individuals whom speak, teach, or testify about "how to overcome dysfunctional habits that keeps perpetuating illogical grieving patterns.

It is thrilling to participate in this new- educational grief recovery that always promotes spiritual grow.
