

My name is Ivan Zoot and I love The Body Comb!

I have been using the body comb for a few years now. I started promoting them to haircutters at my shows and classes this past year and they have become a HUGE hit with haircutting professionals. Pro haircutters LOVE the Body Comb!

I promote The Body Comb as my comb of choice for all shear work. I use them for shear-over-comb, blending shear-over-comb and all traditional over-finger cutting. The unique tooth design is PERFECT for managing tension and distribution of all hair types and textures when cutting. The wider teeth provide a loose, low tension feel for the natural flow of hair. The shorter, quarter-inch teeth have a nice grab and hold effect when hair is sinking deep into the teeth to manage tension beautifully. I never demonstrate on stage without The Body Comb.

I cut hair better when I cut hair with the Body Comb. I have broken three Guinness World Haircutting records in hair cutting. I will not cut hair without The Body Comb! Try it today! You will love them too.

Thank you,

Ivan Zoot
