

2019

## Seedling Tree Order Form

Popo Agie Conservation District  
221 S. 2nd Street, Lander, WY 82520  
Ph: 307-332-3114  
Fax: 307-332-3855 [www.popoagie.org](http://www.popoagie.org)

- ◆ Careful planning and preparation are required for best results. Although the species listed have proven adaptable to Wyoming conditions, limitations may apply. For assistance with species selection, stop by our office.
- ◆ No warranty, expressed or implied, is available for seedling stock. Orders subject to availability. We encourage you to order early for the best selection. Once an order has been confirmed, NO REFUNDS. Trees are sold in lots according to the stated quantity.
- ◆ We are unable to mail trees, they must be picked up at the PACD office on delivery day. (Dates are subject to change from the nursery.)

### LAST DAY TO ORDER - April 15, 2019

### DELIVERY DAY - May 1, 2019

Trees need to be pick up on delivery day  
8:00am to 4:30pm

*The Popo Agie Conservation District Seedling Tree Program enables landowners to obtain conservation grade seedling trees at a nominal cost.*

*Seedling tree sales support the Adopt-A-Tree program which is provided to all fourth grade students within our district. Students learn about the importance of trees and receive a tree to plant at home.*

*Thank you for your support of this natural resource program.*

## SHRUBS

ANTELOPE BITTERBRUSH\*: Small shrub, wildlife value, drought tolerant, alkaline tolerant, well drained coarse soils.

BUFFALOBERRY\*: Medium to tall shrub, alkaline tolerant, rapid growth, edible fruit, riparian planting, wildlife value.

CARAGANA: Medium to tall shrub, drought tolerant, alkaline tolerant, rapid growth

CHOKECHERRY\*: Tall shrub, wildlife value, edible fruit, alkaline tolerant, rapid growth, poisonous to horses.

COTONEASTER: Medium shrub, drought tolerant, wildlife value, windbreaks, fall color.

GOLDEN CURRANT\*: Small to medium shrub, alkaline tolerant, riparian, edible fruit.

LILAC: Tall shrub, good for windbreak purposes.

MTN. MAHOGANY\*: Medium shrub, alkaline tolerant, wildlife value, needs well drained soils, slow growing.

NANKING CHERRY: Medium shrub, does well in most soils, edible fruit, wildlife value.

NATIVE PLUM\*: Medium to tall shrub, wildlife value, edible.

NEW MEXICO PRIVET: Medium shrub, drought tolerant, alkaline tolerant, wildlife value.

RED-OSIER DOGWOOD\*: Small to medium shrub, riparian plantings, wildlife value, red stems.

SUMAC\*: Small to medium shrub, excellent drought resistance and tolerant of alkaline soils.

WAX CURRANT\*: Small shrub, drought tolerant, rapid growth, riparian, edible fruit, wildlife value.

WILD ROSE\*: Small shrub, alkaline tolerant, high wildlife value, riparian planting, rapid growth, suckers.

## TREES

APRICOT: Small tree, rapid growth, sparse edible fruit, striking fall color, windbreaks.

ASPEN\*: Tall tree, poor drought resistance, alkaline tolerant, rapid growth, riparian, wildlife value.

BUR OAK\*: Medium to tall tree, drought tolerant, tolerant of a wide range of soils, wildlife value.

HACKBERRY\*: Tall tree, drought tolerant, alkaline tolerant, rapid growth, shade tolerant, wildlife value.

HONEYLOCUST: Medium/tall tree, drought resistant, open fine-textured, rapid growth rate.

PEACHLEAF WILLOW\*: Medium tree, shade tolerant, alkaline tolerant, riparian, rapid growth, wildlife value.

PRAIRIE SKY COTTONWOOD: Medium to tall tree, riparian, good canker resistance, usually cottonless, rapid growth, shade intolerant.

\*Native plants that have benefits for wildlife, and are suitable for wildscaping.

## CONIFERS/EVERGREENS

AUSTRIAN PINE: Tall tree, good for windbreaks, wildlife value, drought tolerant.

COLORADO BLUE SPRUCE\*: Tall tree, alkaline tolerant, wildlife value, bluish-green color.

DOUGLAS FIR\*: Tall tree, wildlife value, well drained slightly acid soils.

EASTERN RED CEDAR: Medium tree, alkaline tolerant, drought tolerant, windbreak, wildlife value.

ENGELMANN SPRUCE\*: Tall tree, alkaline tolerant, drought tolerant, requires shade early on, wildlife value.

LIMBER PINE\*: Tall tree, full sun or partial shade, tolerant of rocky soil.

LODGEPOLE PINE\*: **High elevations 6,000' to 11,000', tall**, slow growing, long life span, high wildlife value.

PONDEROSA PINE\*: Tall tree, alkaline tolerant, drought tolerant, does not like heavy clay, wildlife value, windbreak, shade intolerant.

ROCKY MT. JUNIPER\*: Medium tree, alkaline tolerant, drought resistant, wildlife value, windbreak.

| BARE ROOT - LOTS OF 25                    |           |              |
