

AlkaViva Athena Sediment Shield Ionizer Filter

\$44.95

Sediment Shield Filter for AlkaViva (Jupiter) Athena

This newest .1 micron Sediment Filter: is only for use in the AlkaViva (formerly Jupiter) Athena, Model JS205, water Ionizer. It will not fit in the Miracle Fountain. This improved sediment removal filter is 1 Micron; Fiber filled, and designed to remove particles 5 times smaller than the original filter.

The sediment filter occupies position #1 in your Athena (inside the left filter housing door). When installing the filter, press the reset button to move the counter to zeros. The Sediment filter should be replaced after approximately 500 gallons have run through the filter. A general estimate for average in a 1 to 2 person household with average sediment ppg is that filter should be replaced every 6 months.

Specifications –

- Sediment Removal .1M size
- Filter Media – All Natural Fiber
- Capacity – Up to 500 Gallons depending on Sediment ppm
- NSF Certified
- MADE in USA

Installation -

- **Newer Athena's** - remove adapter to install your filter
