

Senior Pet Care Health Checklist

Please help us by indicating if your pet:

- Shows any change in behavior since your last visit?
- Limps or has difficulty getting up from a lying position?
- Hesitates going up or down stairs, or getting on/off elevated surfaces?
- Has an increase or decrease in weight?
- Moans, growls, or whines when touched or bumped anywhere?
- Is less active recently?
- Any changes in water consumption or urine production?
- Have urine or stool accidents in the house?
- Has bad breath?
- Has experienced any recent vomiting, diarrhea, or constipation?
- Coughs, sneezes, or pants more than a little?
- Licks or chews on any certain part of the body for more than a minute a day?
- Has ever had a seizure?
- Seems to be losing sight or hearing?
- Has a recent skin or hair coat change?
- Recently developed lumps or bumps anywhere on the body?
- Seems confused or disoriented?
- Doesn't greet you with as much enthusiasm as usual?
- Seems less interactive with household members in general?
- Has experienced a change in sleeping pattern?
- Starts yowling or barking for unusual or unknown reason?
- Has shown aggression towards people or other animals?
