

Lean Strategy Deployment / Line of Sight

Lean Strategy Deployment is a proven method to align all the resources of your organization toward meeting the goals and mission of your firm. Also referred to as Line of Sight, Hoshin Planning or Policy Deployment, Lean Strategy Deployment helps turn chaos into order and allows your teams to outperform the competition.

Working with your Leadership Team, **LEANwRIGHT** will either define or reaffirm your organization's Vision, Mission and Cultural Values and 3-5 year Strategic Plan. From that basis, a **1-year Strategic Framework** will be developed at a high level. That framework will then be refined using **Catchball**, or a back and forth exchange with other leaders and their teams to ensure everyone is on the same page and aligned to succeed.

Strategy, Strategic Framework, Lean Roadmap, Tactical Plan & Scorecard PDCA

The **Lean Strategy Deployment** methodology ensures alignment and clarity to allow firms to quickly achieve their goals and succeed in their markets. For more information, contact us at jerry.wright@san.rr.com or 760-802-7957.
