

Woven Woods

Features

- > Offered in a wide selection of natural material styles featuring unique patterns and warm, rich tones
- > Solid stained wood headrail with slightly rounded edges is fashionable, durable and easy to install
- > Standard swivel multi-cord lock and guided pulley system ensure smooth, long-lasting operation
- > Matching valance, available in customized lengths, conceals the operating system
- > Optional privacy liners provide additional room darkening and a neutral outside appearance
- > Optional fabric edge bindings frame the shade and valance using a high-quality sewing process, and add a finishing touch
- > Limited Lifetime warranty ensures your customers' satisfaction

Control Options

> STANDARD CORD LIFT

Features decorative wood tassels that add a classic touch

> TOP-DOWN AND TOP-DOWN/BOTTOM-UP

Lowers the shade from the top down and raises it from the bottom up to allow light to come in while maintaining privacy.

> TWO-ON-ONE AND THREE-ON-ONE HEADRAIL

Two or three shades placed side-by-side on the same headrail, but operate independently.

> CONTINUOUS CORD LOOP CONTROL

Easily lifts any shade, even large hard-to-reach shades, and enables exact positioning. No dangling cords.

> REMOTELIFT MOTORIZATION

Lifts and lowers shades at the touch of a button. No dangling cords. Two systems available:

Infrared (IR) – value choice that is ideal for operating individual shades from up to 30 feet away. Requires line of sight positioning.

Radio Frequency (RF) – robust system with enhanced programming that is ideal for independent or grouped operation of multiple shades. Remote control operates from up to 90 feet away with no line of sight required.

> WATERFALL

The shade attaches to the front of the headrail creating a contemporary look and eliminating the need for a valance. The cord comes through a grommet in the front of the shade for easy control access.

Decorative Options and Upgrades

> FABRIC EDGE BINDINGS

Available on most woven wood styles, these soft, natural-toned fabrics and twills can be sewn onto the edges and bottom of the shade and valance to add a unique decorative accent – offered in both wide and narrow styles.

> LINERS

Provide additional light control and privacy. Available in three opacities – light-filtering, room darkening, and blackout. Our room darkening style features the same color on both sides for a warm street side appearance.

> INDIVIDUAL VALANCES

Come pre-mounted on a 2 ½" headrail and can be mounted over any type of window treatment to add a unique design element.

> MATERIAL ONLY

All woven wood material styles are available cut-to-order and can be used as table runners, placemats, wall décor, and decorative accents.

Hardware and Installation

> Durable stained wood headrail – comes pre-routed and mounts easily to walls, ceilings, or window frames

> Standard flat and L-shaped mounting brackets – make installation fast and easy

> Spacer blocks, extension brackets, and hold down brackets – available for installation flexibility

Brass cord cleats – supplied with every shade featuring standard cord control to enhance child safety

Please Note: Our woven wood shades are uniquely constructed from natural bamboo, reeds, jutes, rattan, grasses and woods. Each shade is one-of-a-kind. Slight cracks, wood imperfections, and variations in color are all inherent in natural products and are not considered flaws – merely enhancements that are part of their natural beauty.
