DESCRIPTION: This is a serviceable hunting bow. Bubinga riser. Riser is in very good condition. This bow may have been left in a barn for 30 years as the varnish on the entire bow was checkered. The bow was stripped and refinished. None of the decals are original. The limbs had some issue with wear, blemishes, and minor stress. On the positive side there is no delamination; no cracks; limbs are straight. Overlays and tips are in great condition. No drilled holes. From a few feet away this looks like a great bow; up close you can see the flaws. Still, if you're interested in a great old hunting bow at a reasonable price, this is it.
