Sd.Kfz.4/1 PANZERWERFER 42

1/35th SCALE GERMAN SELF-PROPELLED ROCKET LAUNCHER

ドイツ自走ロケット砲 Sd.Kfz.4/1
パンツァーベルファー42型

★VEHICLE PARTS ARE PRODUCT OF ITALERI
●車体パーツはイタリア産です。

During WWII both German and Russian forces made extensive use of rocket launchers. The German Nebelwerfer 41 was a towed carriage with a circular formation; it could fire explosive and smoke rockets to a range of 10,000m, and was used on the Eastern Front from 1941 to 1945. It was developed by the German Army and was the first self-propelled rocket launcher.

depression/elevation range from -12 to +80 degrees, and while it was operated from inside the turret, the loading was done from outside. Twenty rockets could be loaded in the turret.

[Faint, illegible text from the reverse side of the page is visible through the paper.]

SAMSUNG

PROJECT RIPCORD

- We're starting to add PERMANENT features, so progress should pick up.
- New field fortification masters delivered to HQ-72 for casting.
- New detail masters delivered to Celtic Works for casting.
- Next build day, this coming Saturday will focus on making masters for the individual fighting positions.
- Deadline for completion is end of August.
- Deadline for delivery is mid-September.

2019 Toy Soldier Show Club Displays

- Saturday, 10 August
- Date overlaps the IPMS Nat's in Chattanooga. I will not be able to attend the Toy Soldier Show.
- Who's not going to the IPMS Nat's and is interested in doing the club display at the museum?
- Will need a volunteer to run the event for the club. I will put you in touch with museum POC, and I will do the initial necessary coordination.
- Volunteer will need to collect up the show supplies and over see the set up at the museum.
