

# Delivering value for our Rental Partners

Highland Safety Systems represents a unique rental opportunity to meet the needs of builders who are focused on addressing worker safety and productivity. The company is focused on delivering a high quality, flexible system with attractive financial models to achieve rapid return on investment and a manageable upfront investment. Act now to benefit from being one of the first to capitalize on this unique offering.

## Highland **EDGE7**

The Highland EDGE7 Integrated Fall Protection System is a high quality, cost effective and easy to install solution designed for maximum safety and efficiency at the construction site. The system is fully engineered and made of galvanized steel. The panels create a safer environment for workers and provide a barrier against falling or wind-blown debris.

The EDGE7 system is the only fall protection system with an integrated fall arrest tie-off ring every 7 ½ feet. With the only adjustable panel on the market, the system provides for various widths and infinite angles. Panels install in seconds making the job site clean, professional and safe.

## The opportunity:

- ~\$100K\* per project opportunity: Enjoy strong rental revenue with high-value, long term transactions
- Flexible and creative financial models provide ongoing revenue opportunity and affordable up-front investment
- Differentiate from your competitors
- Leverage safety and environmental trends
- Strong fit with existing projects
- Easy and efficient system : virtually no maintenance required

\* Assumes 8 floors of 1100 ft. of fencing for 1 year

*" We are very happy with the system and even happier with the service that we received. Highland Safety Systems came out to the site many times to do demos and obtain feedback. They took a look at our specific needs and tweaked the system so that it worked the best for us."*
