

Radiating Pain

Testimonial

Patient: Jessica (Last name not given for privacy)

Sex: Female

Age: 50

Jessica started coming into the office because of severe neck pain. Jessica was a non-believer when she first started treatment in our office, but she stayed the course. Jessica had been a gymnast in her youth and had been in a major car accident and a motorcycle accident. She had been getting treatment for about 4 months at the time of this testimonial. She states that after years of pain she is now pain free!! Congratulations!!

“My quality of life has been improved 100%. I am able to turn my head to the left and look over my shoulder without pain. Since getting regular adjustments my neck pain has seemed to have disappeared.”

Referring your friends and family, and trusting us with those that you love, is the nicest compliment possible!
