

At Cascades at Riverwalk we specialize in post-hospital rehabilitation services including; physical therapy, occupational therapy, and speech therapy. We have highly trained RNs 24/7, and certified wound RNs. MD and NP on site, 7 days a week. Our goal is to help everyone we treat to return home safely with the skills and strength to function at their highest possible level.

Admissions

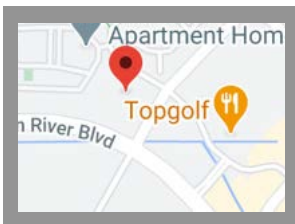

We have a unique team with different roles, that make admissions easy and efficient. We offer options and resources even if we are not able to admit to our facility. We have an Admissions RN that facilitates a smooth transition from the hospital to our facility, by working with case managers, and visiting hospitals if needed. The team wants your admission to be seamless in your care from facility to facility.

COVID Visiting Update

The first 10 days of admission, the resident will be on quarantine. The resident will go to a quarantine gym for therapy. The resident will have a window room where family may visit at any time. Family can drop off items for the resident at the main door, between 9:00 am-5:30 pm. After the 10 days of quarantine, the resident will move to our 2nd floor where they are free to move around the facility wearing a mask. At this time, the resident is able to have compassionate visits. To set up compassionate visits, call the receptionist desk. 2 people may visit at a time. A rapid COVID test will be done on visitors and then visitors and resident can visit for 30 minutes.

Directions

We're easy to find! From the 1-15 freeway, take the 72nd South Exit (Exit #297) and drive directly west about one mile (.8 mile). Cascades will be on your right at the intersection of Jordan River Blvd and River Gate Drive.

Skilled Nursing Services

We provide skilled nursing care for short term and long term residents. We are experienced in caring for patients with a wide range of diagnose and needs including: orthopedic surgery, stroke, cardiac, COPD, CHF, IVs, TPN, Tube feeding, and wound care. Our nurses have strong clinical and assessment skills to collaborate with providers in areas of care that need attention.

Physical, Occupational and Speech Therapy

Our therapists specialize in physical rehabilitation after hospitalization. Our physical, occupational and speech therapists create a custom rehabilitation plan of care to maximize your outcomes and help you return to your prior level of function. Not only are we goal driven, but we are also compassionate and caring. Our team will lead you through the healing and rehabilitation process. Each one of our team members is highly trained and we will select the right therapist for your specific case to ensure your success.

Accommodations, activities, services

Our building was designed with plenty of room includes private and semi-private rooms, each with their own showers. Our rooms provide a comfortable and healing atmosphere while our on-site activities, events, and entertainment provide a stimulating environment for our long-term residents. Our meal preparation team is focused on nutrition, preference, and quality of every serving. The menu is reviewed and approved by a registered dietitian to ensure the highest quality. If you prefer, you are welcome to have these same high quality meals in the comfort of your room. We also provide complementary transportation service to doctor appointments.
