

THE MATERIAL:

EPS foam is an inert material, usually one pound per cubic foot density. Manufactured in large billets, it is then altered into its application form. Its construction is closed cell; it has high insulation value, and a class 'A' flame spread of 25 or less. Due to its lack of water absorption and its resistance to weather change, EPS foam adapts to a myriad of application possibilities.

ORDERING:

Foam shapes come in standard four and eight foot lengths. We have an outside sales representative to help you through the ordering process. We will be glad to come to your job site or office to help you with the layout or design of your project.

Lead-time is usually 1 day when ordering foam, and 1 week when ordering pre-coated product, depending on the coating process chosen.

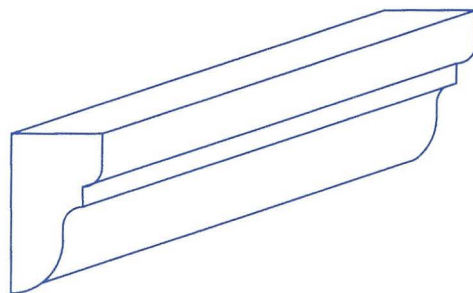

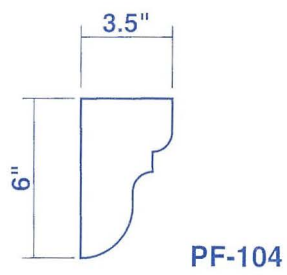

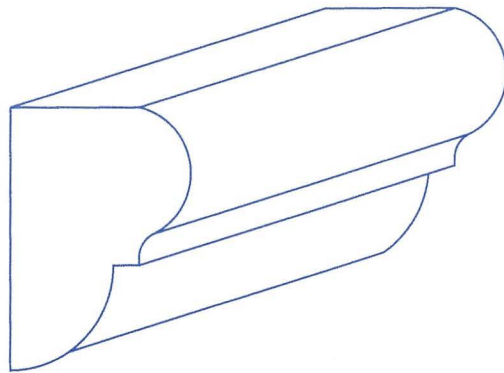

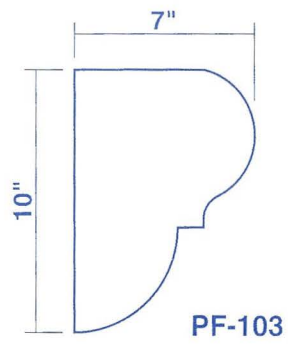

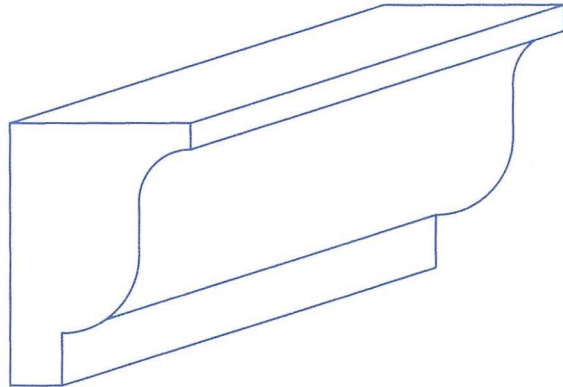

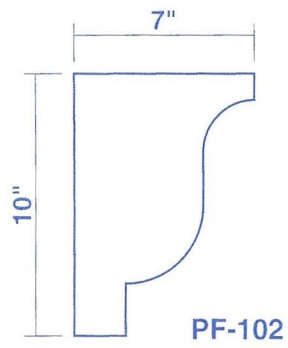

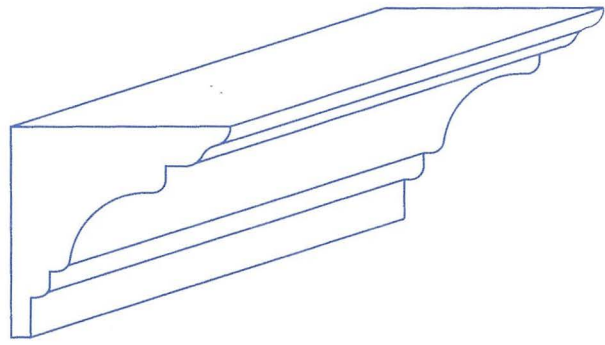

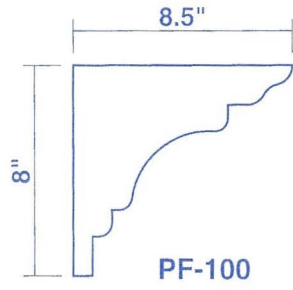

We require a scaled drawing at the time of ordering. Please indicate all dimensions on the drawings. If unavailable, we will produce a shop drawings that requires your approval before your order can be processed.

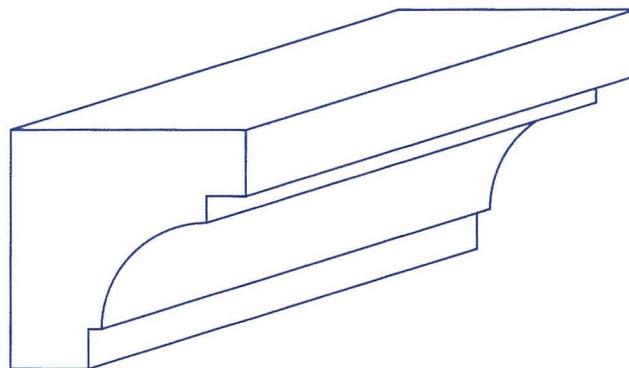

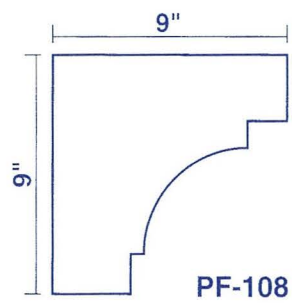

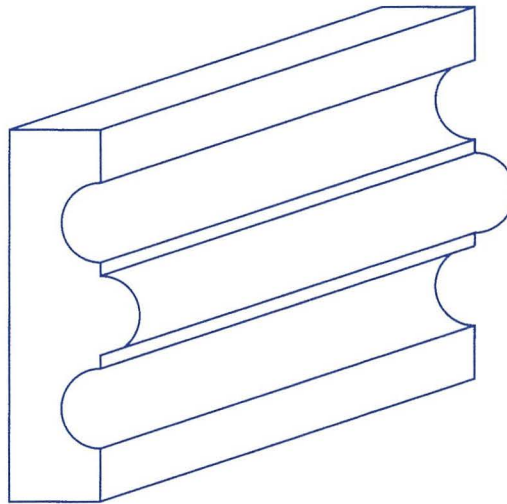

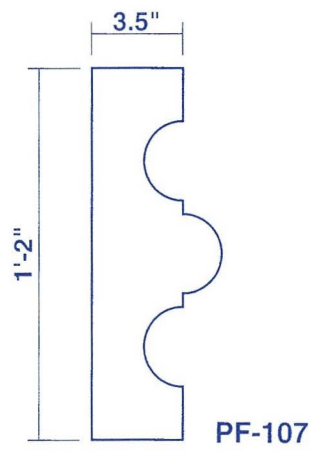

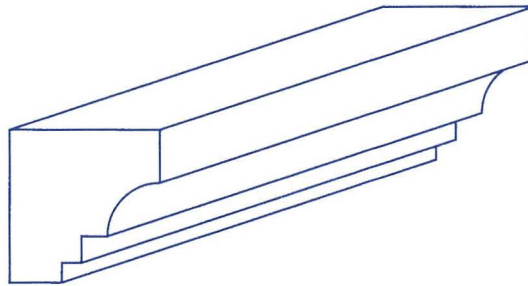

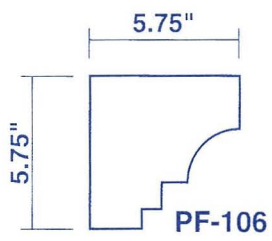

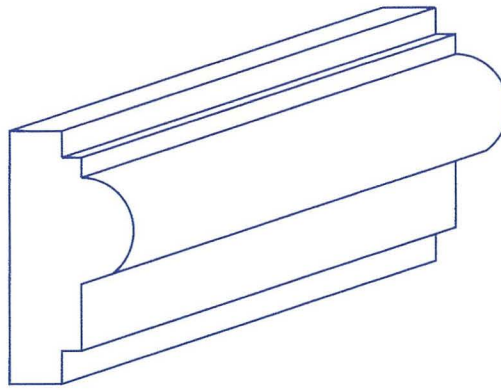

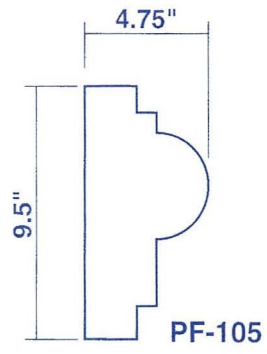

PAYMENT:

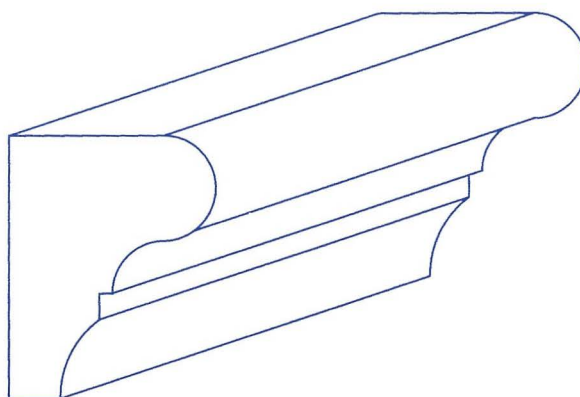

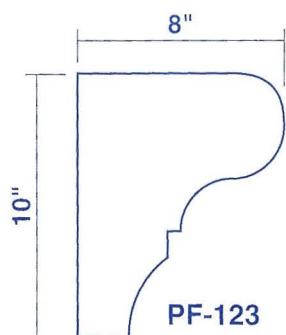

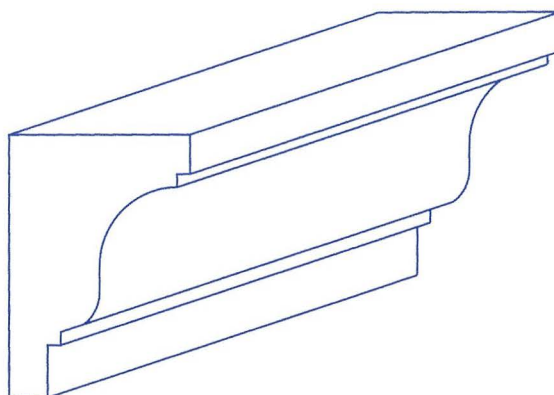

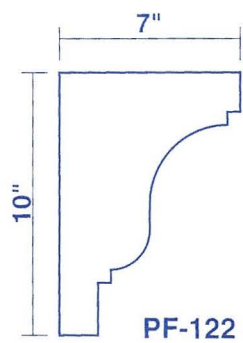

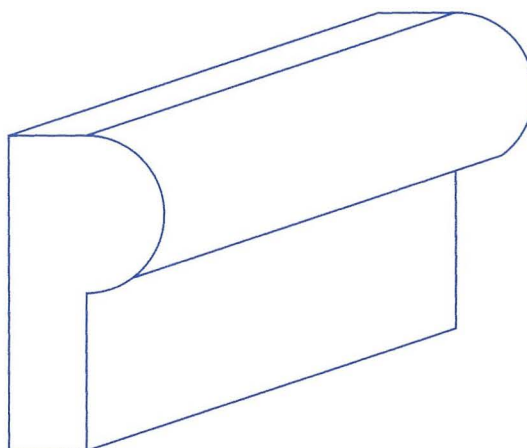

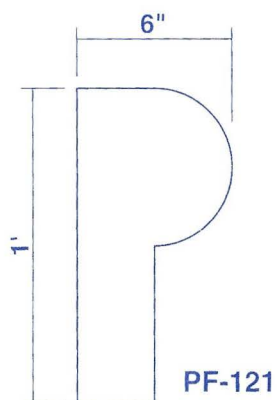

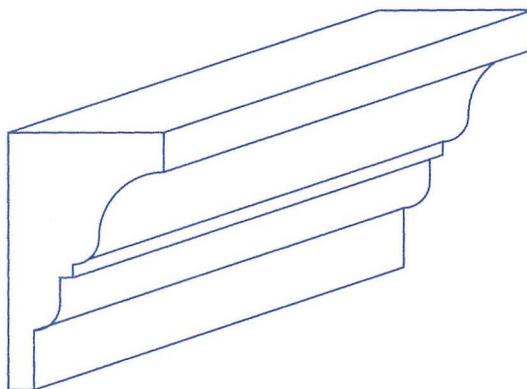

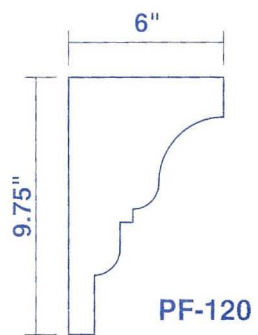

Our minimum order is \$25.00. On COD orders we require a 100% deposit at time of ordering.

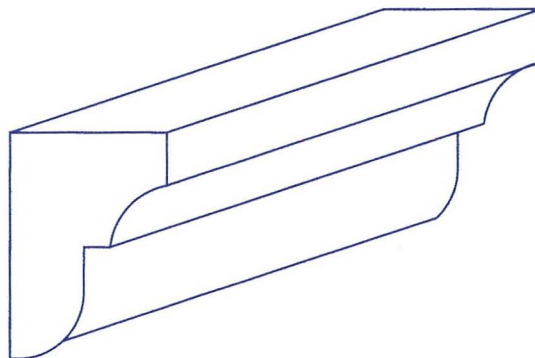

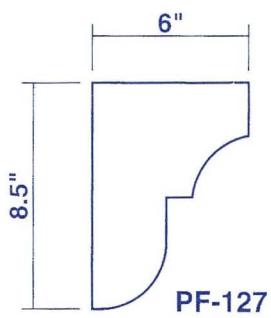

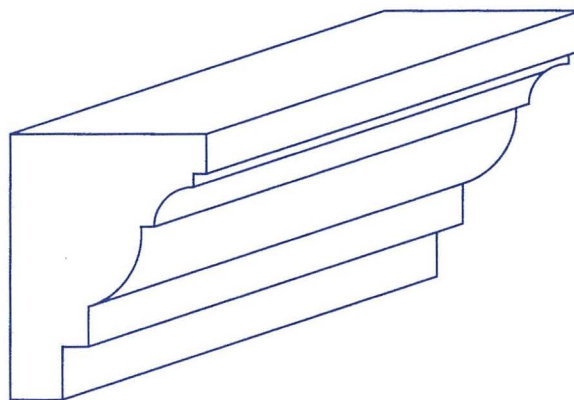

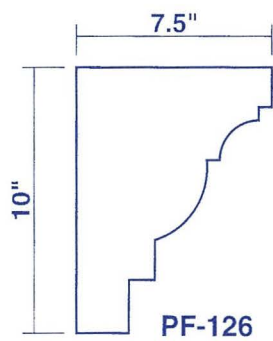

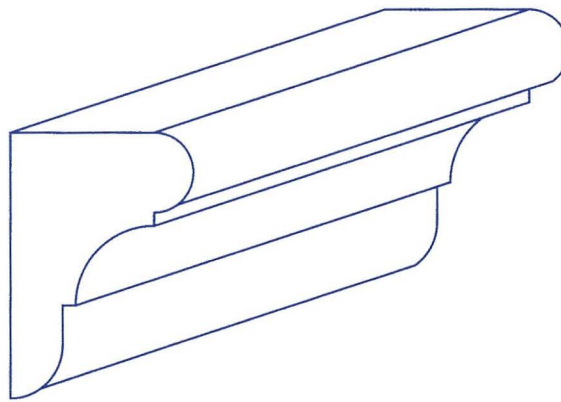

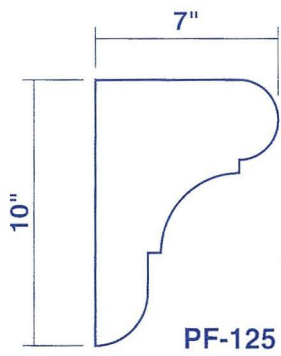

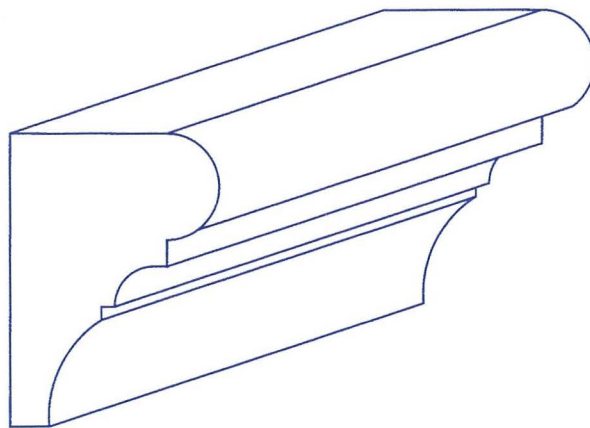

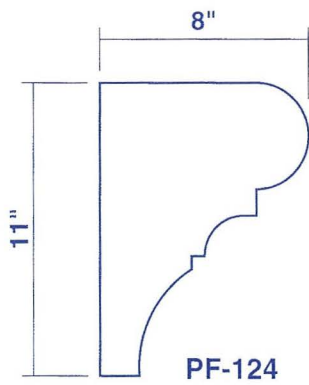

DELIVERY:

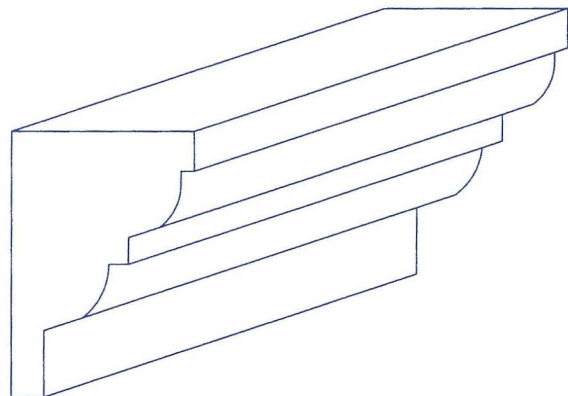

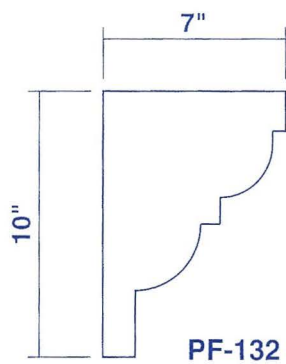

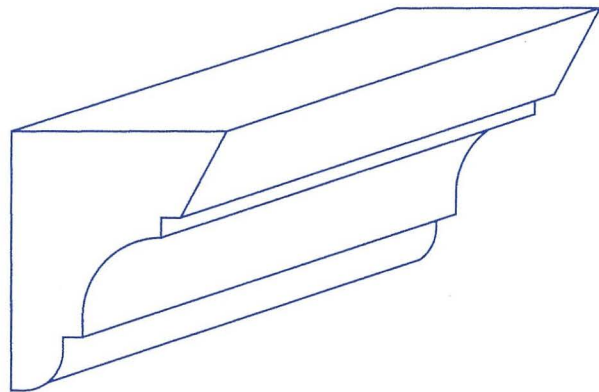

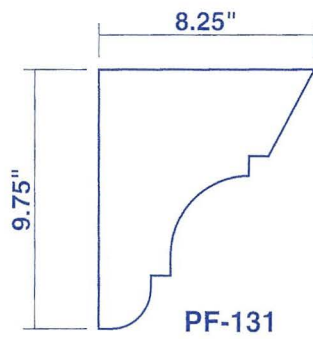

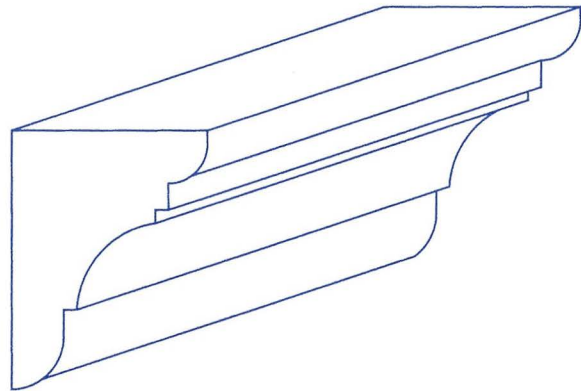

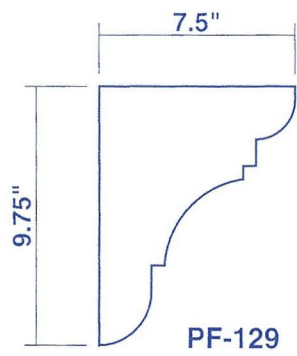

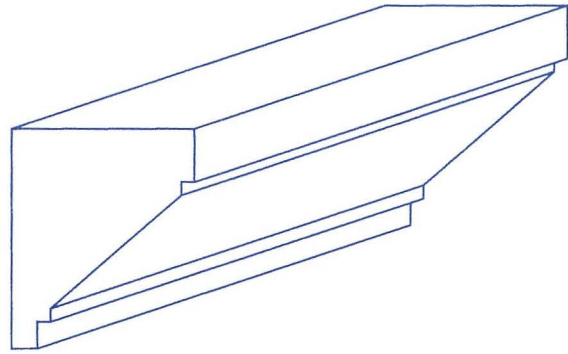

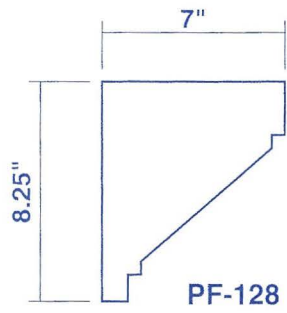

We offer delivery to any location, either in our trucks or through an outside delivery service. For orders under \$500 there is a \$75.00 delivery fee. If we need to use an outside service, then price will be determined by them.

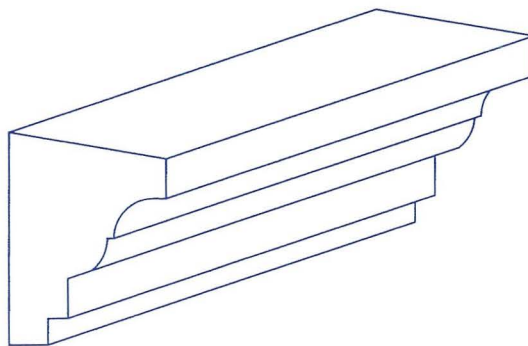

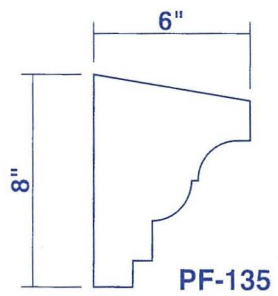

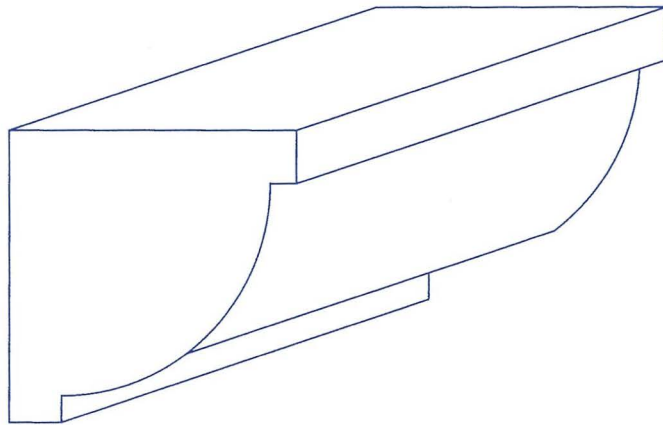

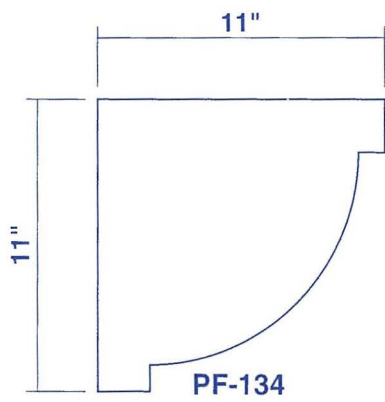

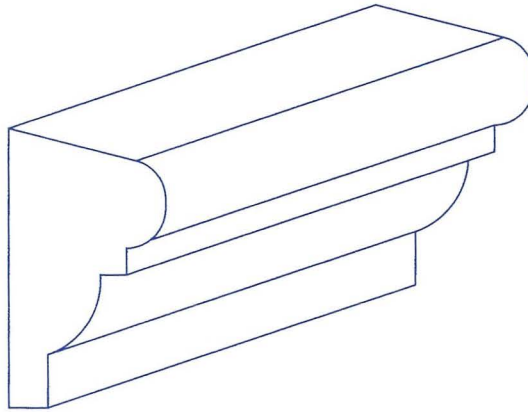

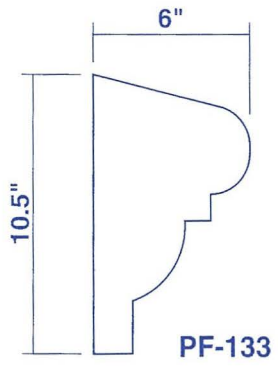

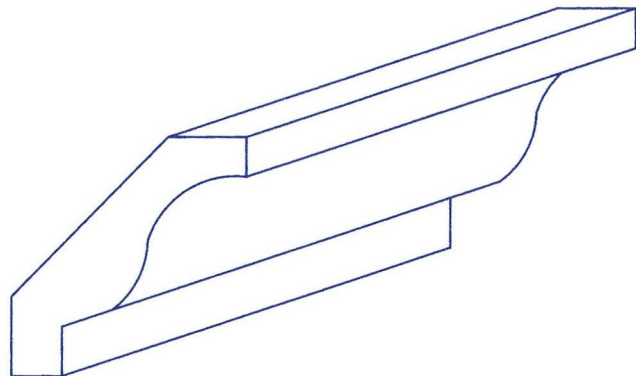

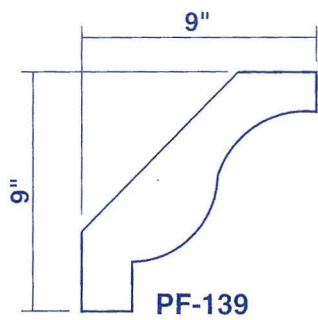

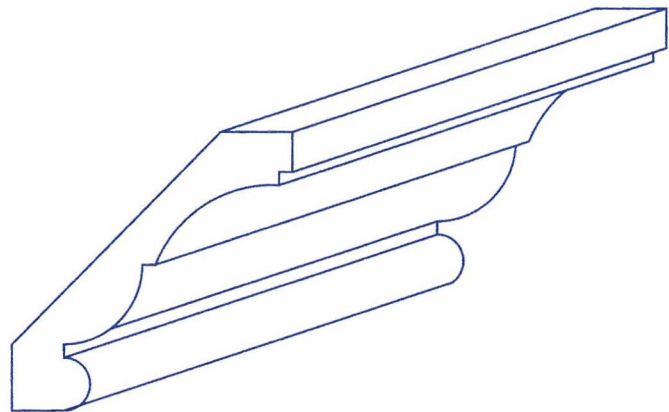

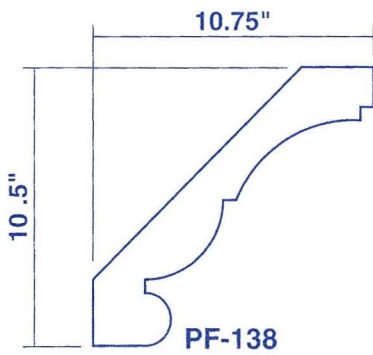

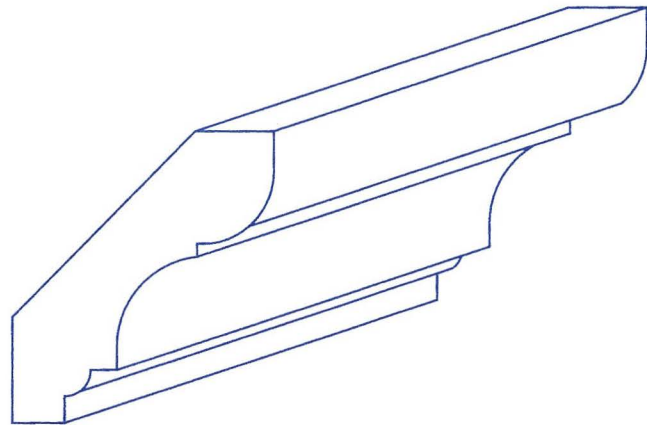

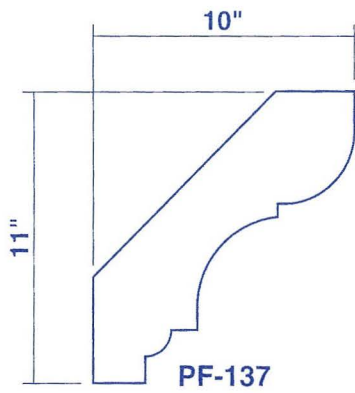

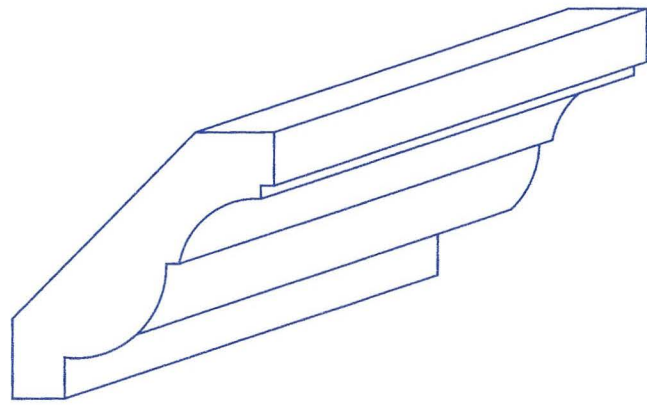

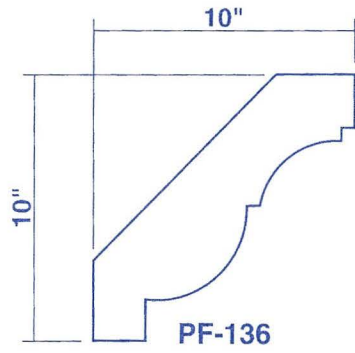

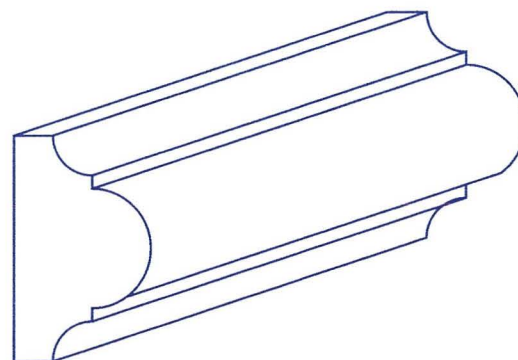

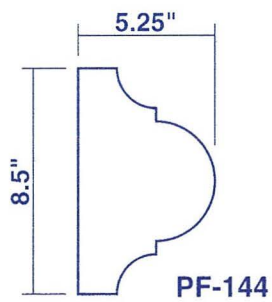

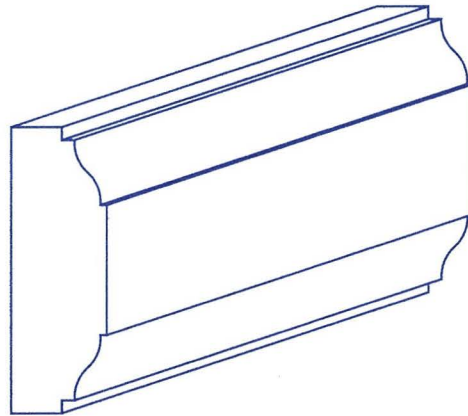

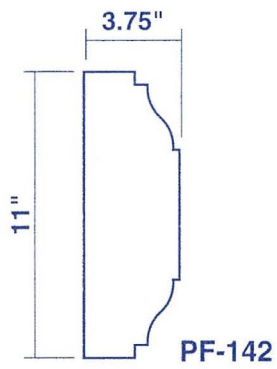

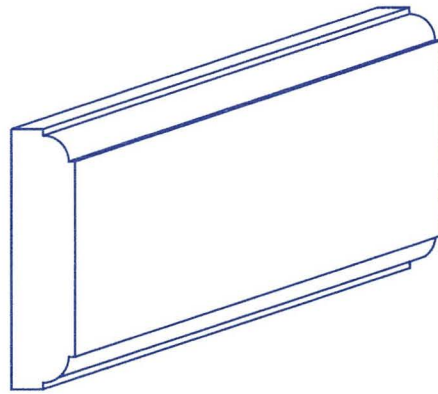

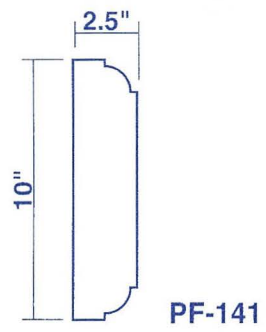

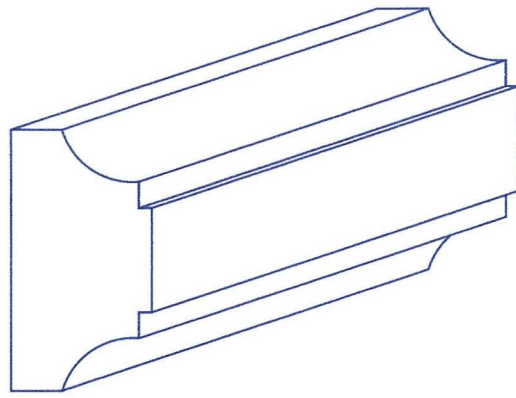

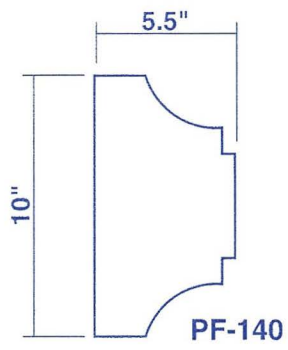

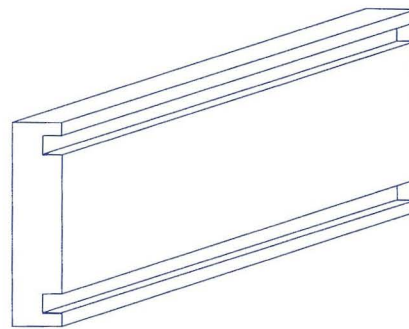

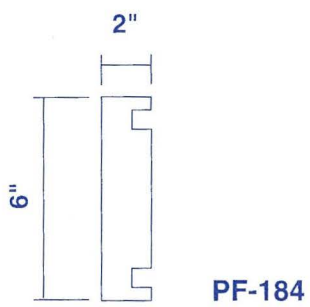

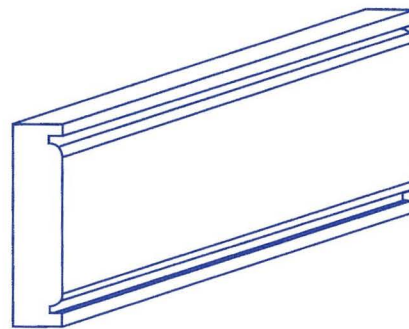

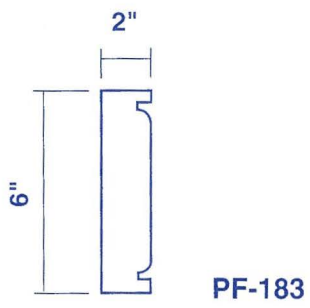

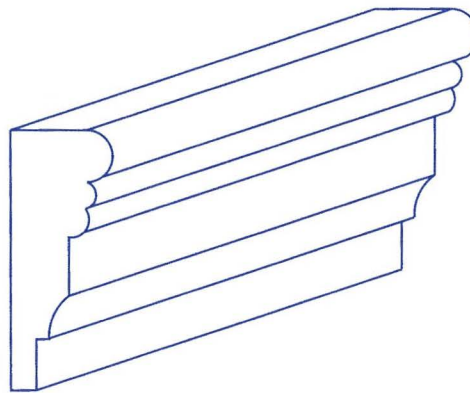

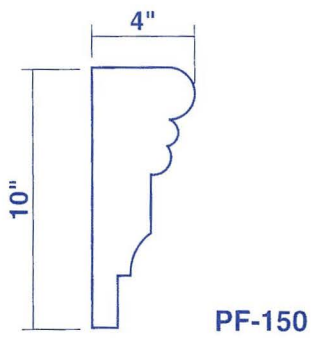

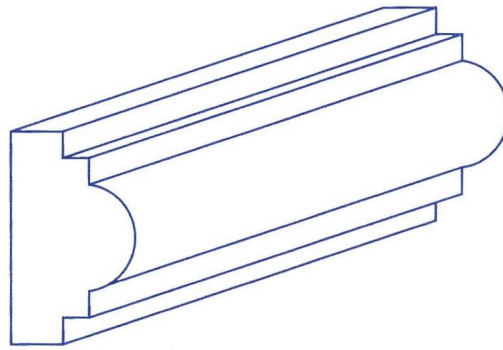

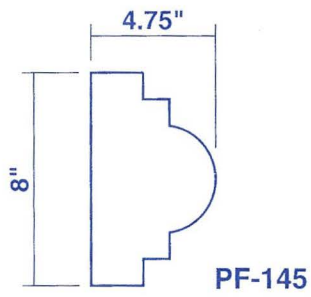

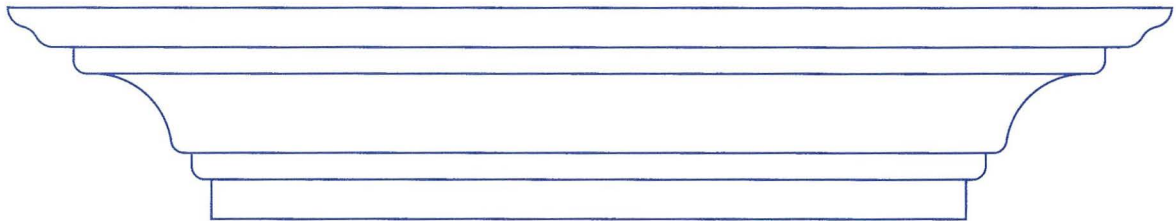

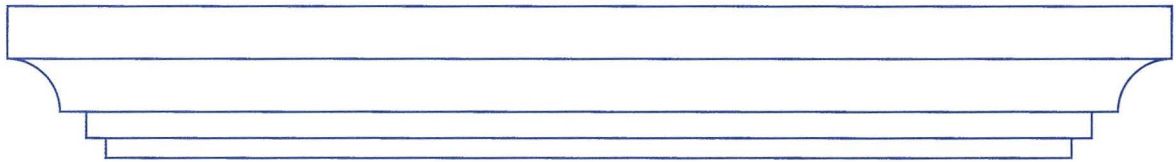

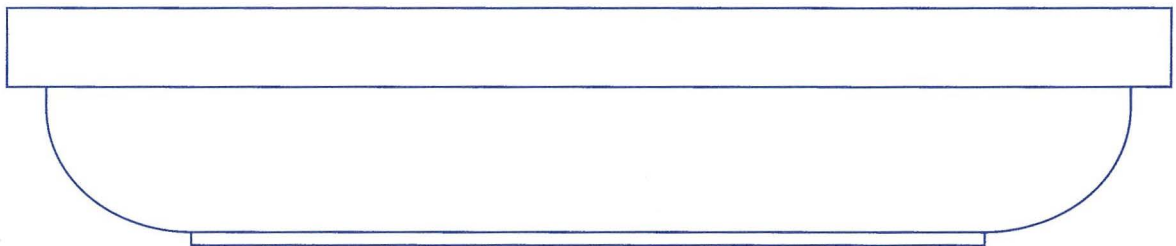

The following potshelves are just an example of the infinite variations that can be accomplished with any of our shapes. For added convenience, we create inside and outside mitres to accommodate all job conditions. Including rake and eave details.
