Intelligent physical security that tells you
WHO** (accesses your server racks), **WHERE, WHEN & HOW LONG

Secure – Restrict and monitor access to server racks at cabinet level. Identify who accessed specific racks and track the time the cabinet door was open.

Notify – Automatically send an email alert, sound an alarm or call-up video if server cabinets are unsecured.

Report – Robust reports generator provides customized audit report of access to server rack cabinets.

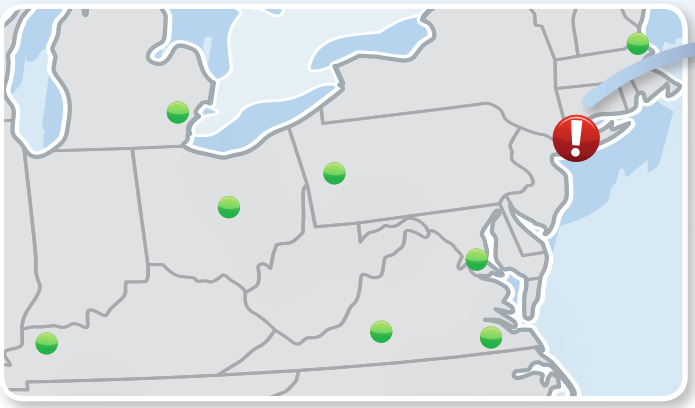
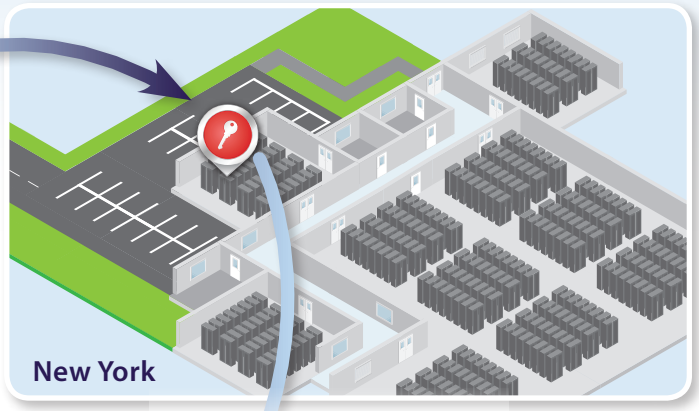
RACK ARMOR™ server protection is a patent-pending physical security solution from IDenticard® that secures and monitors server rack access at the cabinet level. With easy-to-use dynamic mapping and customizable reporting capabilities, RACK ARMOR server protection is the intelligent security system that tells you WHO accesses your server racks, WHERE, WHEN, and HOW LONG.

DYNAMIC MAPPING



Dynamic Mapping provides a graphic display of your system so you can instantly visualize the security status of your server racks across multiple locations.



When a rack is in alarm, quickly drill-down to pinpoint its exact location.

RACK ACTIONS

The Rack Action screen provides instant verification of the security status for both the front and back doors of each cabinet.

Icons show if a door is forced or key is used. These actions can also send an email alert, sound an alarm, or open up video.

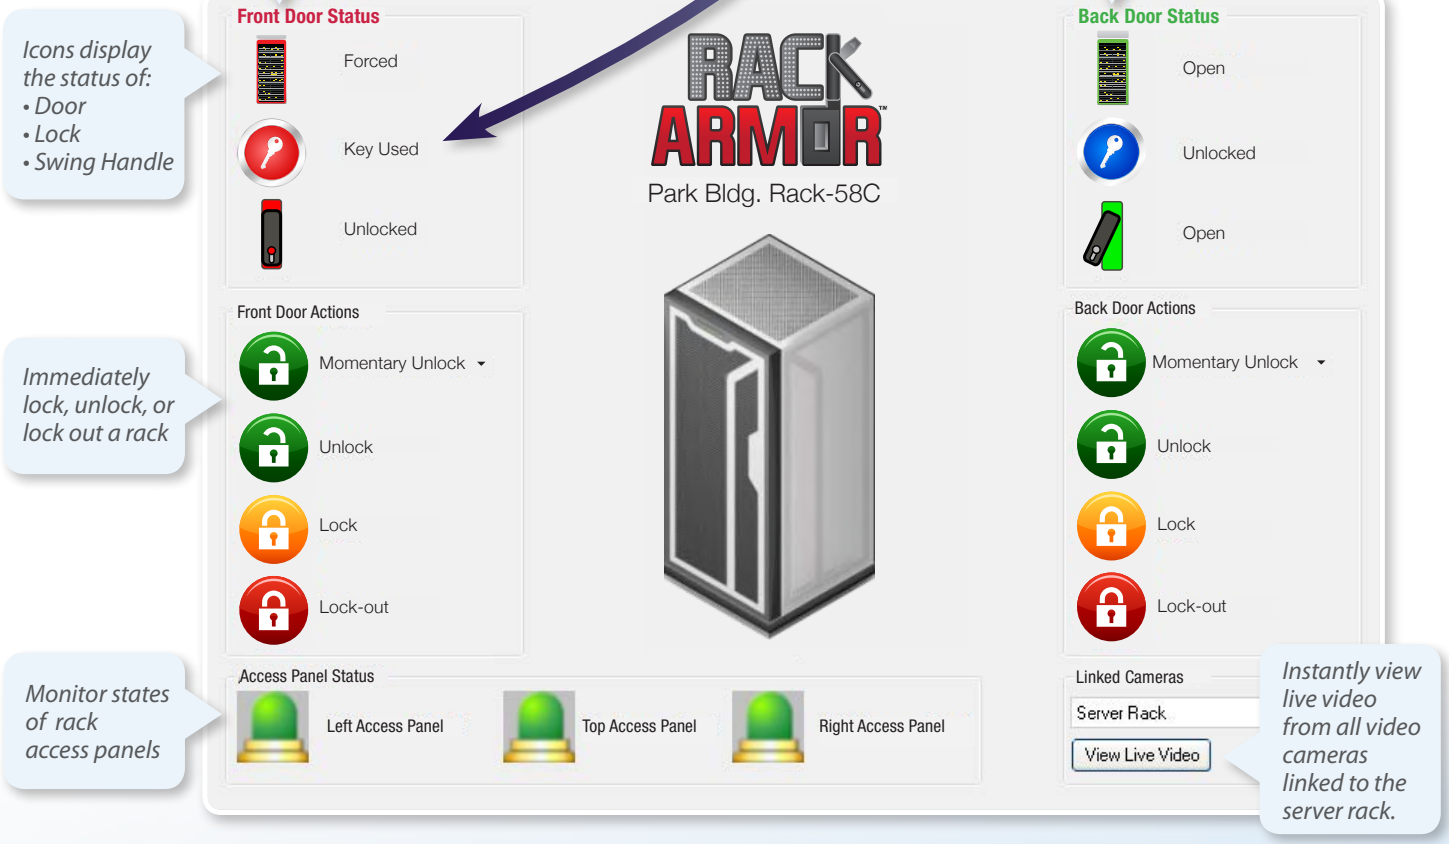
Shows front and back door for a single server rack

Icons display the status of:
- *Door*
- *Lock*
- *Swing Handle*

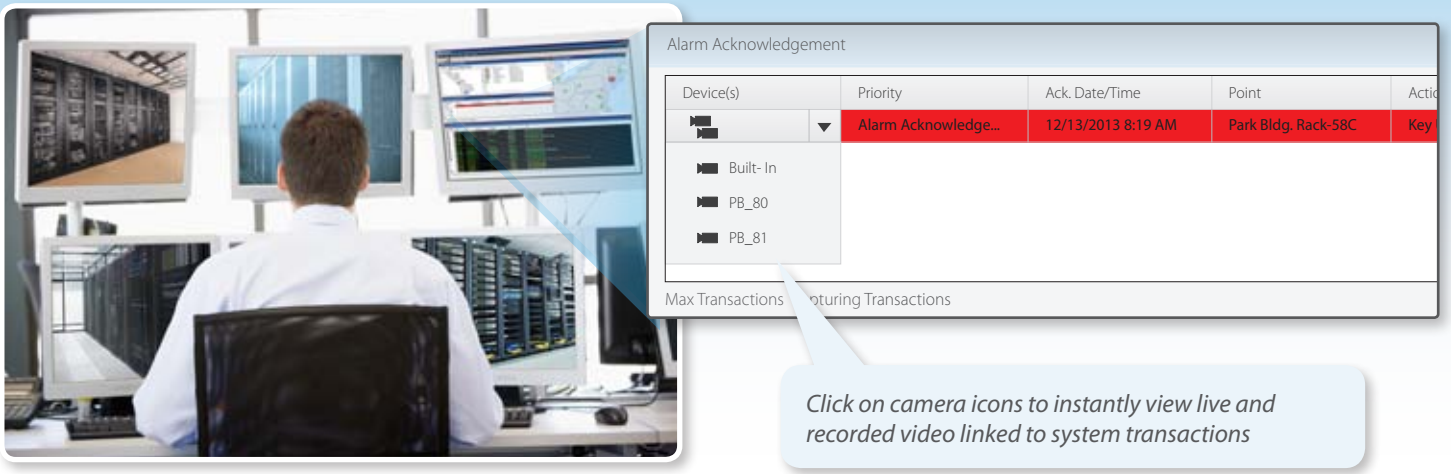
Immediately lock, unlock, or lock out a rack

Monitor states of rack access panels

Instantly view live video from all video cameras linked to the server rack.



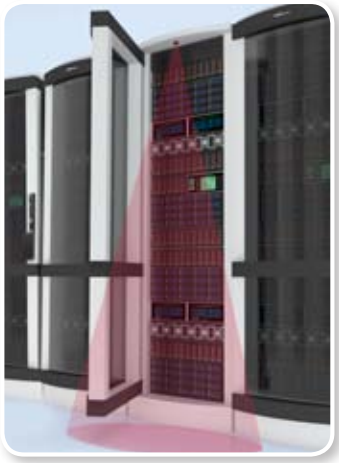
ALARM ACKNOWLEDGEMENT



VIDEO PROVIDES AN EXTRA LAYER OF SECURITY

- *Automatically call-up video for specific transactions*
- *Store video logs of cabinet access, server rack actions, and user keystrokes*
- *Open up live video from Dynamic Map, Rack Actions screen, and Alarm Acknowledgement window*
- *Compare current and past states during alarm conditions by displaying live and recorded video side-by-side*

Built-In Camera

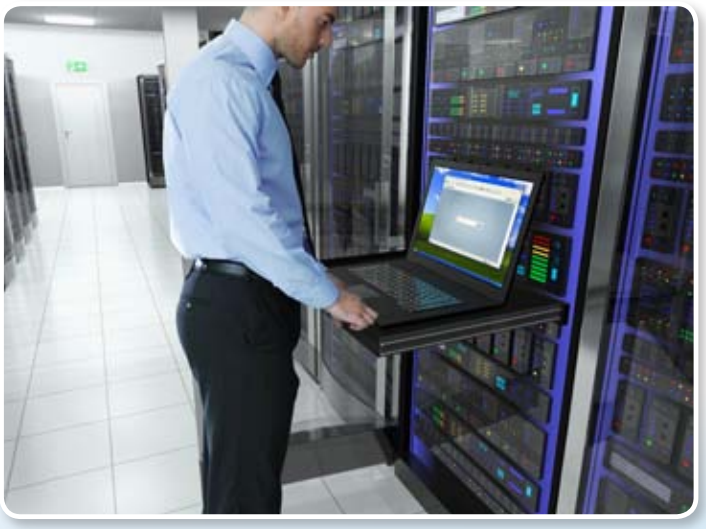


Built-in cameras record keystrokes of user activity

Swing Handle with Reader

Electronic swing handle includes card reader

Facility Camera View



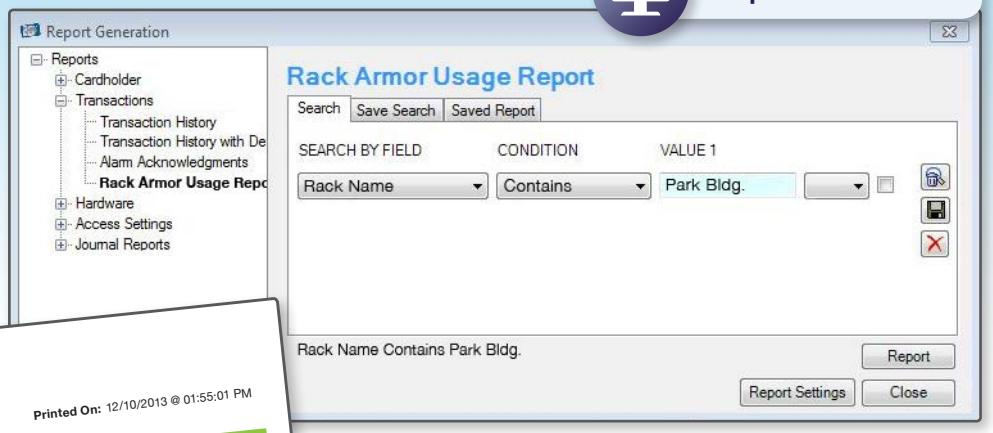
Built-In Camera View

View live and recorded video for each server rack from multiple camera angles.

ROBUST REPORTS GENERATOR PROVIDES DETAILED INFORMATION OF SERVER RACK ACCESS

- *Generate complete information of user activity*
- *Filter transactions by customer, cardholder name, rack name, and more*
- *Identify which door has been opened and for how long*
- *Link transactions to recorded video*
- *Export reports as Excel, Word, RTF, or PDF*

Reports Generator



Create and save customized reports to track server rack usage, transactions, and alarm acknowledgements.
