Full Height and Two Drawer Base

Sierra Vista® PAINTED HAZELNUT GLAZE

Sierra Vista® COLLECTION

To reach the high point of elegance, head to Sierra Vista®. This solid wood door style with mitered cuts at each corner, reminiscent of a fine picture frame. A classic and sophisticated design, with furniture quality mortise-and-tenon construction and extra-wide 3" frames surrounding a raised center panel.

Sierra Vista® DOOR STYLES

Sierra Vista® doors are solid wood, *full overlay*, and designed with a *raised-panel mitered* style. Matching 5-piece mitered drawer front. Available in cherry, maple and painted finishes.

MAPLE

PAINTED**

CHERRY

* Denotes premium finish

** LINEN uses a luxurious opaque painted finish to accentuate crisp lines and rich detail with an inviting texture.

SILK uses a radiant, warm white paint to establish an elegant and classic tone.

BUTTERSCOTCH GLAZE uses a light brown glaze to provide prominent highlights over an off-white base paint.

HAZELNUT GLAZE uses a deep brown glaze that is wiped over a warm-white painted surface to create a vivid contrast.

NOTE: Painted doors feature engineered wood center panels for a superior finish.

The glazes on our painted finishes are hand-applied, so no two doors will look exactly alike. And while the door front and edges are completely concealed by the base, some wood grain may show on the door back.

Decorative hardware is required and must be ordered separately.

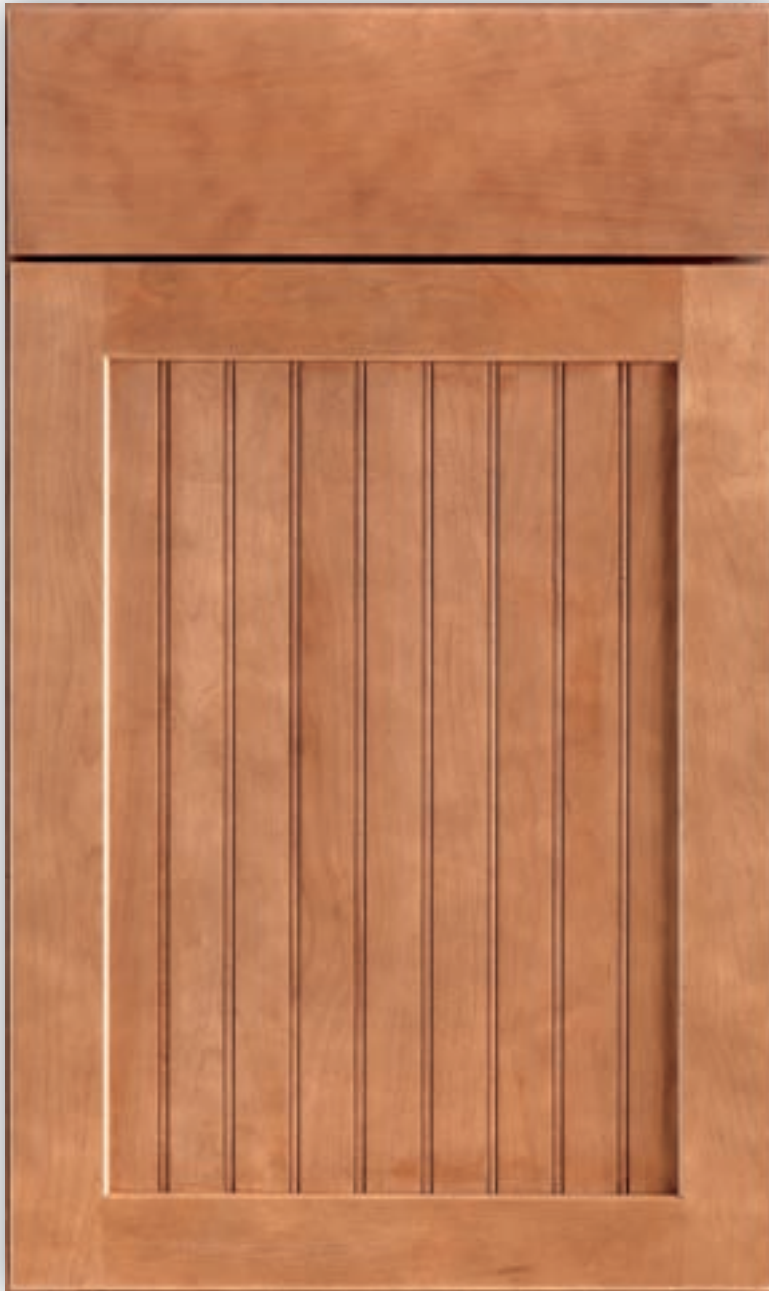

Tucson® WHITE THERMOFOIL

Tucson® COLLECTION

The distinctive bead-board center panel of solid wood resembles wainscoting, making Tucson® one of a kind. Simple, angled edges on the framing add a contemporary twist, making it a versatile and appealing choice for many décors.

Tucson® DOOR STYLES

Tucson® doors are solid wood with *full overlay* in a *square bead board* style. Available in hickory, maple and painted finishes, as well as in white thermofoil.

IT'S A *fact* OF NATURE

NO TWO PIECES OF WOOD ARE EXACTLY ALIKE — *even from the same tree.* THESE VARIATIONS IN WOOD AND GENTLE AGING OF WOOD AND PAINTED SURFACES CONTRIBUTE TO THEIR BEAUTY AND DISTINCTION. YET, IT IS IMPORTANT TO UNDERSTAND WHAT TO EXPECT.

ENVIRONMENTAL FACTORS

Cabinetry added at a later date may not match the original cabinets installed. This may be due to:

- » Exposure to sunlight, smoke and chemicals
- » Change in door samples or displays due to age (they may no longer be a true color representation)
- » Because of environmental factors, Timberlake is not responsible for texture differences or color and wood grain variations in wood or laminate materials used in your cabinets.

CARE & CLEANING

While our laminate, painting and wood finishing processes promotes durability, care should be taken to preserve the original factory finish:

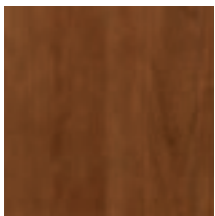

- » Wipe up spills immediately
- » Use mild soaps only
- » Be sure to read all cabinet care guidelines and cleaning product instructions carefully

NATURAL FACTORS

All cabinet materials are graded to industry standard but variations should be expected:

- » Naturally occurring color, grain and texture differences
- » Color deviations, even within the same section of wood
- » Differences between open- and closed-grain areas
- » Variations in the finishing process, each piece will respond differently to the finishing materials used
- » Just as wood naturally expands and contracts, so do door joints. Periodically, you may see hairline cracks in the finish surface at the joints. These are normal and do not affect the integrity of the door.

CHOOSE YOUR MATERIAL

CHERRY

Cherry is a closed-grain hardwood with uniform texture, known for its warmth and distinctive curly figures and pin knots. Its natural color ranges from pale yellow sapwood to deep reddish brown heartwood. From the time it is cut, cherry begins to darken. This gradual change gives the wood its warmth and charm. Cherry is particularly attractive when stained a deep, rich color.

HICKORY

Hickory is a heavy hardwood and when finished has a warm, appealing appearance. Distinctive red heartwood and white sapwood streaks combine with knots and other markings for a dramatic appearance. While some parts are clear, the variations are an inherent part of hickory's charm and are considered a desirable part of the look.

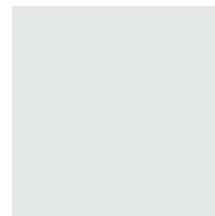

OAK

Oak is an open-grained hardwood with patterns ranging from straight grain to wide arcs. When stained, there is a noticeable difference in the color between the open and closed grain areas. Wood cut from the heartwood will range from pink to reddish brown. Because of the distinct grain, oak is one of the most popular woods for cabinetry.

MAPLE

Maple is an extremely hard wood with a fine, even texture. Its natural color is a light to cream-colored sapwood. Although it has uniform straight grain, it may exhibit wavy, curly, bird's eye or burl graining. Maple grain may also reveal mineral streaks and worm tracking when stained. These characteristics are natural and are not considered defects.

THERMOFOIL

Thermofoil is a process whereby a thick vinyl film is bonded permanently to a warp-resistant engineered wood core. Because the color is throughout the film, the surface is durable, easy to clean and especially resistant to chipping and cracking.

PAINTED

Painted finishes combine hardwoods and engineered materials to achieve a product with superior stability, consistency, coverage and durability. These finishes yield radiant painted cabinetry leaving natural wood grains less evident. Visible joint lines may appear due to the natural expansion and contraction of wood.

BeautyGuard[®] MULTI-STEP FINISHING PROCESS

A We start with hand-selected, premium-grade hardwood lumber. Individual components are triple sanded with progressively finer grit. This allows us to reach those difficult to reach areas before doors are assembled.

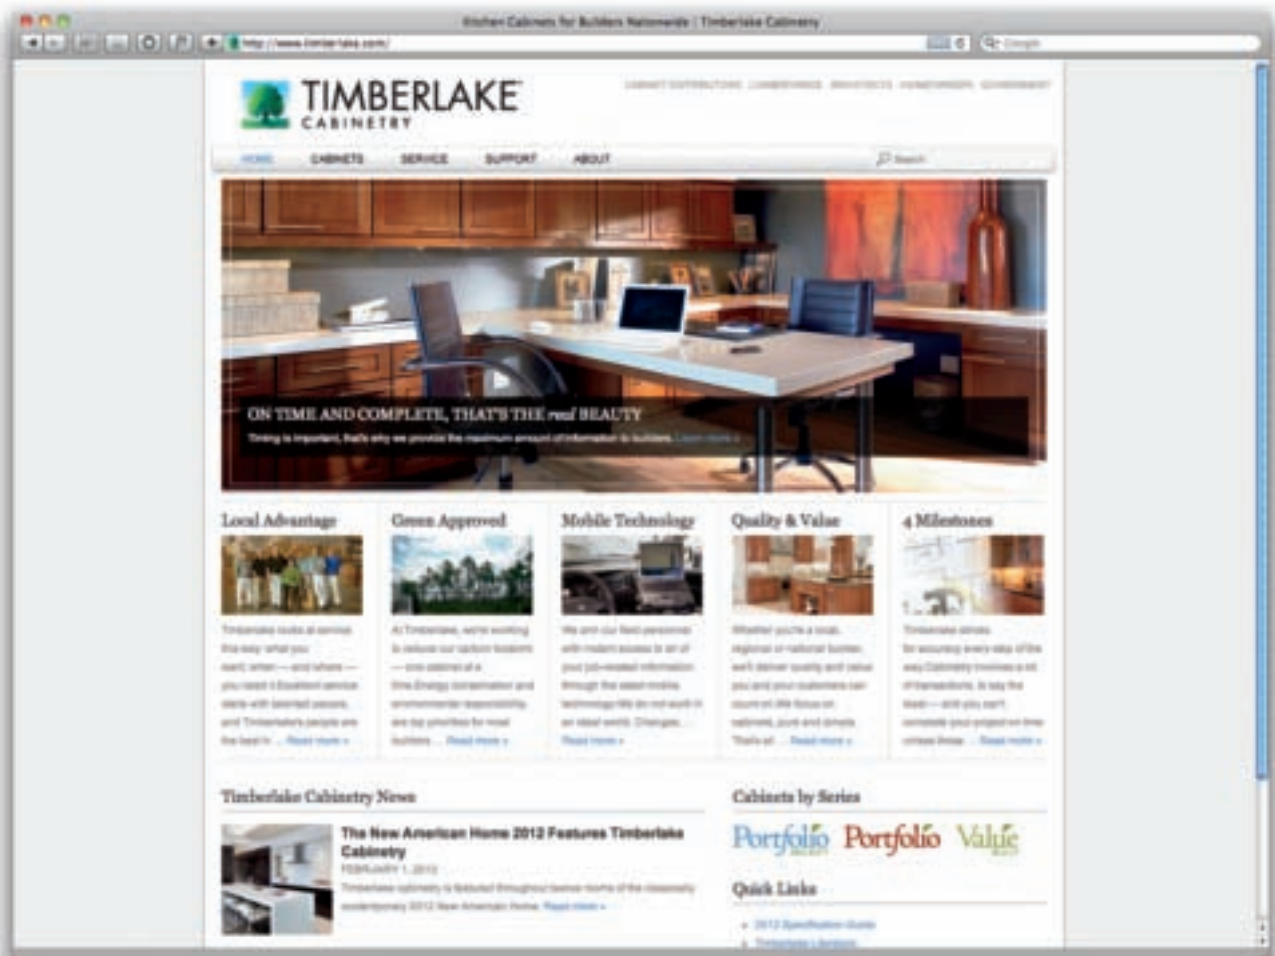

B After assembly, an inspection is conducted for conformance to demanding specs, then a pre-stain is applied to certain “sensitive” colors in order to assure the desired finish.

C A penetrating layer of stain is applied using a spray/brush combination. With an artisan’s touch, stains on cherry and glaze finishes are hand rubbed into the wood allowing the grain pattern to come to life.

D Two coats of a high-solids sealer are applied during the finishing process to tighten and fill the grain and provide a layer of “build” to the finish that adds a deep, rich luster. After each coat the cabinets are lightly sanded.

E Finally, our exclusive formula of Rel-Plaz II[®] topcoat is applied and baked on to protect all layers. After final inspection and testing for chemical resistance, water penetration, mar and abrasion, this process is complete.

CABINETS BUILT-TO-ORDER

Since all Timberlake cabinets are *built-to-order*, special construction needs are not a problem. These options do not add time *or* complexity. All options are shipped as part of your regular order in the standard turnaround time.

REDUCED DEPTH CABINET OPTION

Both wall and base cabinets are available with reduced depths in one-inch increments — all the way down to an incredible four inches deep!

INCREASED DEPTH CABINET OPTION

Deeper cabinets often come in handy for designers. Our Increased Depth Option for wall cabinets allows you to select cabinets deeper than the standard 12" depth on cabinets up to 36" wide. The Increased Depth Option is available in one-inch increments from 13" to 24" deep on the following cabinets only: Wall Cabinets, Peninsula Wall, Blind Wall, Blind Wall Peninsula, Straight Appliance Garage, and Bookshelves.

INVERTED FRAME CABINET OPTION

The Inverted Frame Option, available for most standard base cabinets, allows the drawer to go below. This option is also available for Base Pot & Pan Organizer and Factory Installed Wastebasket(s) Cabinets. Can be combined with Plywood Veneered Side Option and Reduced Depth Option for most standard base cabinets.

MATCHING INTERIOR CABINET OPTION

Ideal for built-in cabinets or cabinets with glass doors, the matching interior upgrade provides an interior color that matches the exterior finish for a custom look.

VOID DOOR CABINET OPTION

The Void Door Option means cabinets will ship without doors, battens or hinges. Since stiles are pre-drilled for hinges, molding is used to provide a finished look. Choose from three moldings to be cut and field installed.

CushionClose® HINGE OPTION

The CushionClose® Hinge Option features a slow closing mechanism that helps reduce slams and noise, and is available on *Portfolio Select*® and *Portfolio*® Series.

CushionClose® GLIDE OPTION

The CushionClose® no-slam, air dampening drawer closure system is available on *Portfolio Select*® and *Portfolio*® Series only.

FURNITURE ENDS OPTION

The finished look of the Furniture Ends Option for cabinet sides is available only on *Portfolio Select*® and most *Portfolio*® cabinets. The ¾" plywood veneer sides can be chosen for individual cabinets or the whole room.

ALL PLYWOOD CONSTRUCTION (APC) OPTION

The APC option is available for all *Portfolio Select*® and *Portfolio*®* wood door styles and features ½" plywood sides, floors and cabinet tops. The captured back, inset toe kick, corner blocks and shelves are also constructed with plywood. The furniture grade veneered side panels are finished to match your chosen cabinet color with our multi-step BeautyGuard® finishing process.

PLYWOOD VENEERED SIDE OPTION

This option adds extra strength. These ½" thick plywood panels are furniture-grade veneer, finished to match your chosen cabinet color. The interior is protected with our TuffTech® finish of bonded acrylic for added durability.

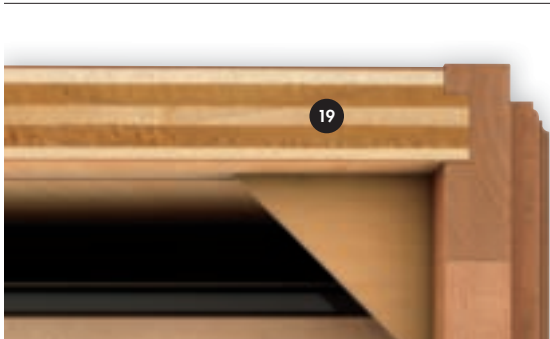

DEEP DOVETAIL SLIDING SHELVES

Forget hunting for things in the back of the cabinet. These sturdy trays slide everything into view. Tray kits fit both standard base and utility cabinets.

*Dovetail Full-Access Drawer Option required with APC option on Portfolio wood door styles.

AN INSIDE LOOK AT TIMBERLAKE FEATURES

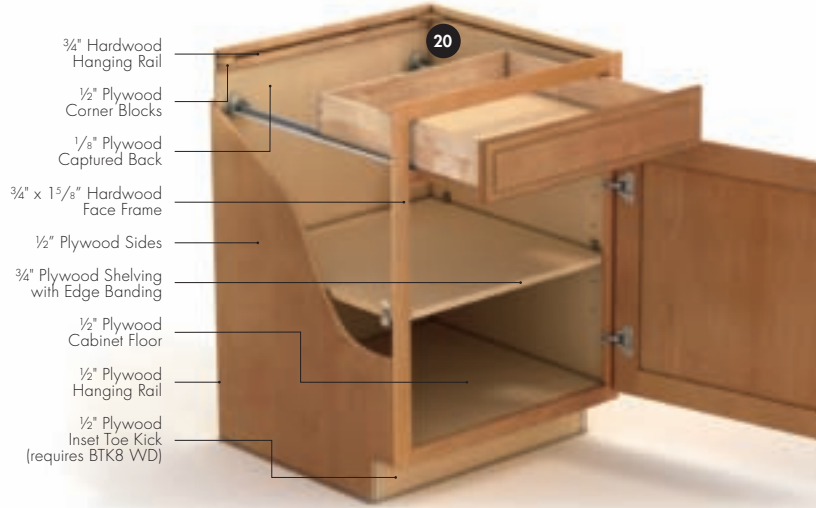

FURNITURE ENDS OPTION

3/4" Furniture Ends Construction

Shown with All Plywood Construction Option. Also available with Standard Construction.

QUALITY ALL PLYWOOD CONSTRUCTION

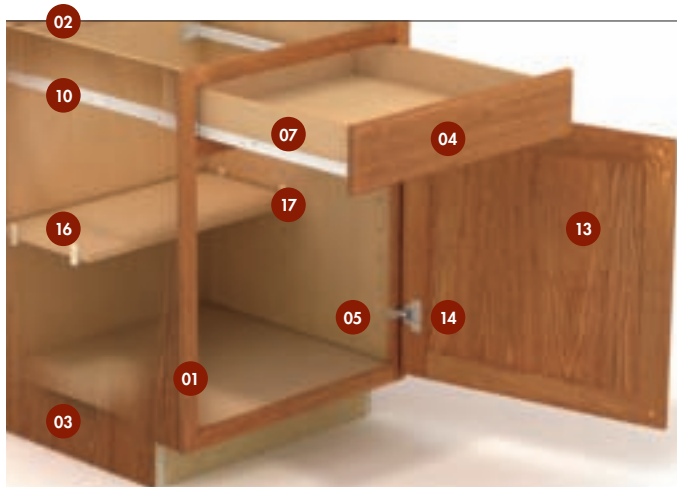

Choose the perfect combination of features for your needs... and budget. Timberlake makes it simple. There are three series — each with different features and options — to help you satisfy every type of homebuyer: from entry level to move-up to luxury.
