Caring for your new Product(s):

Premium Windows uses quality materials and workmanship, giving you the best quality Product(s) available. Proper usage, cleaning and maintenance will result in many years of "like new" performance. These are helpful tips:

- Keep lower sill channel and weep holes clean and free of dirt and debris.
- Apply a small amount of spay lubricant to rollers on movable window/door panel(s), wiping off any excess
- Clean glass and frame members with a mild soapy solution and rinse with clean water (a mild class cleaner may be used).
- DO NOT USE steel wool, abrasive scrub pads, wire brushes, razor blades, petroleum base solvents/cleaners or corrosive materials.
- Screens may be vacuumed to remove dust or may be washed with a soft brush and a mild soapy solution, then rinsed with clean water.

CAUTION:

Use of any petroleum based or corrosive materials on insulated glass surfaces is not recommended. This includes oil based lubricants. These products may damage the insulating properties used in the window and may void all warranties. Tinting or placing foil on internal side of windows/doors can cause excessive heat gain and can result in damaging insulated glass.
