

Reasons to Study Geo.

1.

- The world has not always looked like it does now
 - Anti-deluvian
 - Pangea?
 - Many political and societal changes

2.

- It is a powerful tool for proving Bible inspiration
 - Critics are proven wrong
 - The nature of a book of fiction vs non-fiction

3.

- You have been given wrong information/maps
 - Most standard maps are wrong on a few very important things
 - Maps are not necessarily written by believers
 - Maps don't supply you with good understanding (i.e. Gaza strip – philistines)

4.

Much of the Bible is Geography, if it were not important, God would not have mentioned it.

5.

- Geography “puts you there” in the Bible text.
 - You might want to go there some day
 - It is all over the Bible and gives you an understanding you would not otherwise have.

How we will proceed with the class:

- I am not bound by progressing through the books, though we could
- Time dictates how detailed we will get.
- Presentations will be left online for a while.
