

ATX Grip
Custom Easy ISO V3 Vibration Isolator Specs

RAPTOR ISO3 ULTIMATE FLEXIBILITY AT THE LIGHTEST DESIGN

Underslung Only

Specification

Construction: Aluminum
Dimensions (LxWxH): 230 x 200 x 200 (mm)
Weight: 3kgs/6.61lbs
Payload: Up to 40kgs/88.18lbs

Raptor ISO3 is a much lighter and improved range of motion in professional design. This one provides the added horizontal smoothness, allows more massive payload equipped with the gyro-stabilized head when shooting with arm, crane, jib...

BRAND NEW STEERING DAMPER

The Raptor Dampener is made in house by Custom Easy, which is improved strength and reliable performance.

This dampener increases gimbal heads' efficiency by reducing rotational stress and smoothening out pan errors by isolating high-frequency vibrations between the mount & head and delivering perfect results.

There is one damper for each axis, which helps to optimize the weight of Raptor ISO V3.

LIGHTWEIGHT DESIGN

Raptor ISO V3 is the world's lightest iso dampener, helping you to expand the boundaries with a more massive camera or long lens during shooting with remote head.

TOOLLESS DAMPING ADJUSTMENT

Raptor ISO V3 features built-in toolless damping adjustment knobs for optimal calibration, best suit for your camera payload, and the shooting environment.

Compact Design and Improve Range of Motion
