

More recently I was blessed with the opportunity to provide private lessons to a young talented artist a couple of times a month. My granddaughter and I also create together whenever we can.

In my art studio, we create and encourage each other to make beautiful art.

My body of work includes both studio practice and social practice.

The social practice consists of the creation and collaboration of this organization with others in and around this community who share a passion for the arts, as well as previous collaborative Art Show sponsored by the Kiwanis Club of Bolingbrook and Romeoville and themed on the beloved Route 66 where again passionate people came together and created something new and different for the community to experience.

In my studio practice, I enjoy creating art with watercolor paints. Recently, I have been working on some pieces with acrylic paints and have also experimented with some mixed media.

I love many styles of music, books and I enjoy taking pictures with my Nikon camera. Most of my image files are of nature and interesting architecture.

My favorite places are museums, arboretums and a comfy chair with a good book.
